Mental Health Client-Level Data: 2019

This codebook documents the Mental Health Client-Level Data (MH-CLD) for the 2019 reporting period. MH-CLD provides demographic and mental health characteristics for clients who have used mental health services in facilities that report to individual state administrative data systems. National mental health client-level data reporting was launched in 2011.

The general framework for the MH-CLD involves a compilation of the demographic, clinical, and outcome data of individuals served by the state mental health agency (SMHA) within a state-defined 12-month reporting period. States may choose the calendar year or the state fiscal year as their reporting period. *Individuals served* is defined as all enrolled individuals who received mental health and support services, including screening, assessment, crisis services, and telemedicine/telehealth, from programs operated or funded by the SMHA during the reporting period.

Two data sets are submitted each reporting period: Basic Client Information (BCI) is due December 1, and the State Hospital Readmission (SHR) data set is due March 1 of the following year. These two data sets inform five mental health national outcome measures (NOMs): access to services/capacity, stability in housing/residential status, 30-day and 180-day readmission to state hospital, adult employment or children's school attendance and education level, and criminal justice involvement. There are five additional NOMs—social connectedness, decreased mental illness symptomatology, perception of care, cost effectiveness, and use of evidence-based practices—that have not been converted into client-level data reporting and continue to be captured in the Uniform Reporting System (URS). Data are reported in accordance with the Health Insurance Portability and Accountability Act (HIPAA) rules for non-protected health information (non-PHI).

In 2010, the Substance Abuse and Mental Health Services Administration (SAMHSA), through the Center for Behavioral Health Statistics and Quality (CBHSQ), began a parallel effort of testing the feasibility of building a national behavioral health database that integrates both mental health and substance use data using a uniform platform for data reporting. This effort led to the integration of mental health data into the well-established system of reporting for substance use client-level data, known as the Treatment Episode Data Set (TEDS). To enable reporting of mental health client data to TEDS, the system was modified to incorporate data elements that capture the characteristics unique to the mental health services system and the individuals receiving mental health services. These characteristics include, among others, the extended period of time that an individual may be engaged in treatment, the recovery process, and the simultaneous receipt of different types of services from different service providers. This method of reporting mental health data at the individual level is referred to as the Mental Health Treatment Episode Data Set (MH-TEDS).

Unlike MH-CLD, MH-TEDS is structured around treatment events, that is, admissions and discharges from specific service settings. Admission and discharge records can be linked to track treatment episodes and the treatment services received by individuals. Thus, with MH-TEDS, both the individual client and the treatment episode can serve as a unit of analysis, whereas with MH-CLD the client is the sole unit of analysis. The common TEDS platform in which both the substance use and mental health data are reported enhances the ability to report data on people with co-occurring mental health and substance use disorders. It also offers optional data fields for individuals with mental illness that are not captured in MH-CLD, such as referral source, details on criminal justice referral, income sources, and health insurance.

Data Collection

The data described in this codebook are derived from a reconciliation of the two reporting methods (MH-TEDS and MH-CLD), using individual clients as the unit of analysis. If you need copies of the Mental Health Client-Level Data State Instruction Manual and the Combined Substance Use and Mental Health Treatment Episode Data Set State Instruction Manual, please contact the BHSIS Office at BHSIS Outreach@hendall.com.

Reconciling data from MH-TEDS and MH-CLD

Both the MH-TEDS and MH-CLD include individuals served through SMHAs during the state-defined 12-month reporting period. Most states elect to use the state fiscal year, which usually runs from July 1 through June 30 of the following year; however, some states define their fiscal year differently. See the 2022 MH-CLD Annual Report for details.

MH-CLD contains one record for each individual served. Data items are populated by the states based on the status of the individual, either at the start and end of the state's reporting period, or the most recently available data. MH-TEDS contains one record for each admission to, and discharge from, a particular service type/setting (referred to as a treatment episode) within the client's treatment continuum during the reporting period. Data collected from MH-TEDS admission records and update/discharge records are stored as two separate data sets that are linked using a HIPAA-compliant, non-protected health information, unique client identifier located in both files. Linking the records allows for the creation of a single client record comparable to the MH-CLD format.

The process of creating an individual record using the MH-TEDS data allows for the reporting of these individuals in both the MH-TEDS and MH-CLD data sets. See the 2022 MH-CLD Annual Report for the full crosswalk between MH-TEDS and MH-CLD variable names.

Confidentiality Protection

Several measures are taken to protect the confidentiality of all records. Variables that potentially identify an individual in their raw form undergo top- or bottom-coding. For example, age as a continuous variable has the potential to identify both the youngest and oldest participants in a public release file. For this reason, age is recoded for the public use file to reduce disclosure risk. All the variables recoded are documented in Appendix B.

Disclosure analysis is used to identify records that remained unique after routine recoding measures were taken to protect confidentiality. Disclosure analysis is used to discern combinations of indirect identifiers that potentially link an individual to a record. Particular attention was given to the analytic importance of geographic data and of subgroup populations. Subsequently, data swapping was applied to produce the public use file in order to satisfy stringent confidentiality standards while preserving its analytic value.

The original location of a record in MH-CLD cannot be known for certain due to the use of data swapping. This method has several benefits over other disclosure protection options: (1) the overall impact to the data is typically small; (2) nearly all the data are left intact; (3) data for special populations (e.g., minorities) are no more impacted than other data; (4) the procedures typically do not affect any analytic uses of the file; and (5) the procedures allow greater detail to remain on the public use file (e.g., the original ethnicity codes).

Universe/Extract Dates

The universe for this MH-CLD public use file is the data received and processed through November 08, 2023. See the 2022 MH-CLD Annual Report for each state's reporting period.

Coverage

Data in the MH-CLD—whether collected as BCI submitted by SMHAs or derived from MH-TEDS—is supposed to include only clients from providers receiving public funding. However, because each state or jurisdiction decides how to fund their different mental health services providers, there is no independent check on the actual sources of funding. Moreover, the number of clients in the facilities whose treatment is not publicly funded is unknown.

Data Limitations

The MH-CLD, while providing valuable information about mental health service use, does not represent the total national demand for mental health treatment or describe the mental health status of the national population. The MH-CLD is a compilation of client-level data from facilities that operate under the authority of their state mental health administration. The scope of facilities from which the data is collected is affected by differences in state licensure, certification, accreditation, and disbursement of public funds. For example, some state mental health administrations regulate private facilities and individual practitioners, while others do not. Moreover, in some states, mental health services are provided in correctional facilities under the auspice of mental health agencies, while in other states they are not.

Up to three mental health diagnoses per individual can be reported to MH-TEDS or MH-CLD (mental health diagnoses one, two, and three). These diagnoses may not represent a complete enumeration of all diagnoses for individuals served. Furthermore, some individuals have no valid mental health diagnosis reported. If the missingness is not randomly distributed across facilities, estimated prevalence rates of the different mental health diseases may be biased.

Created Variables

The MH-CLD file contains several variables created from the original variables submitted by the states. For example, a variable was created to indicate whether a given mental health diagnosis was reported in the first, second, or third diagnosis field. These are called flag variables and labeled according to the diagnosis, such as *anxietyflg* for the anxiety disorders flag variable, *adhdflg* for the attention deficit/hyperactivity disorder (ADHD) flag, etc.

Contents of Public Use File

The MH-CLD public use file contains minimum and supplemental data from states that report MH-CLD and MH-TEDS data plus the Commonwealth of the Northern Mariana Islands, the Republic of Palau, Puerto Rico, and the District of Columbia. See the State Exclusions section of this codebook for the list of states and other jurisdictions in each year that did not report sufficient data.

The MH-CLD public use files are provided in SAS, SPSS, Stata, R, and ASCII comma-delimited formats.

User Responsibility

Users are reminded that the data are to be used solely for statistical analysis and reporting of aggregated information and not for investigation or identification of specific individuals or organizations.

State Exclusions

The following states did not report sufficient data and are excluded from the given year.

Year	States
2019	American Samoa, Arizona, Federated States of Micronesia, Georgia, Guam, Kansas, Maine, Marshall Islands, New Hampshire, U.S. Virgin Islands, West Virginia

VARIABLE DESCRIPTIONS AND FREQUENCIES

CASEID: Case identification number

Program generated case (record) identifier.

A frequency distribution of this variable is not shown; each case has a unique value generated for identification purposes.

YEAR: Reporting period

Indicates the end year of the state-defined reporting period. Such state-defined reporting periods, while generally encompassing the fiscal year July 1–June 30 of the corresponding calendar year, may also be defined on an October–September fiscal year, a lagged fiscal year, or both.

Value	Label	Frequency	%
2019	2019	6,544,803	100%
	Total	6,544,803	100%

AGE: Age (recoded)

Calculated from the client's date of birth at midpoint of the state's elected reporting period.

Value	Label	Frequency	%
1	0-11 years	918,325	14.0%
2	12-14 years	478,247	7.3%
3	15-17 years	493,980	7.5%
4	18-20 years	310,098	4.7%
5	21-24 years	366,562	5.6%
6	25-29 years	568,492	8.7%
7	30-34 years	547,814	8.4%
8	35-39 years	509,519	7.8%
9	40-44 years	416,552	6.4%
10	45-49 years	418,911	6.4%
11	50-54 years	434,861	6.6%
12	55-59 years	428,997	6.6%
13	60-64 years	307,473	4.7%
14	65 years and older	341,767	5.2%
-9	Missing/unknown/not collected/invalid	3,205	0.0%
	Total	6,544,803	100%

EDUC: Education

Specifies the school grade level of three sub-populations of clients, as follows:

- Current grade level for school-age children who attended school at any time in the past three months.
- Highest grade level completed for school-age children who have not attended school at any time within the past three months.
- Highest educational attainment for all adult clients, whether currently in school or not.

Value	Label	Frequency	%
1	Special education	33,981	0.5%
2	0 to 8	797,406	12.2%
3	9 to 11	550,080	8.4%
4	12 (or GED)	1,068,830	16.3%
5	More than 12	534,029	8.2%
-9	Missing/unknown/not collected/invalid	3,560,477	54.4%
	Total	6,544,803	100%

ETHNIC: Hispanic or Latino origin (ethnicity)

Identifies whether or not the client is of Hispanic or Latino origin. Report the most recent available information for ethnicity at the end of the reporting period.

- Mexican: Of Mexican origin, regardless of race.
- Puerto Rican: Of Puerto Rican origin, regardless of race.
- Other Hispanic or Latino origin: Of known Central or South American or any other Spanish cultural origin (including Spain), other than Puerto Rican or Mexican, regardless of race. Includes clients of Hispanic or Latino origin whose specific origin is not known or not specified.
- Not of Hispanic or Latino origin.

Value	Label	Frequency	%
1	Mexican	54,810	0.8%
2	Puerto Rican	27,150	0.4%
3	Other Hispanic or Latino origin	895,764	13.7%
4	Not of Hispanic or Latino origin	4,800,595	73.3%
-9	Missing/unknown/not collected/invalid	766,484	11.7%
	Total	6,544,803	100%

RACE: Race

Specifies the client's most recent reported race at the end of the reporting period.

- American Indian/Alaska Native: A person having origins in any of the original people of North America and South America (including Central America) and who maintain tribal affiliation or community attachment.
- Asian: A person having origins in any of the following people of the Far East, the Indian subcontinent, or Southeast Asia, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
- Black or African American: A person having origins in any of the Black racial groups of Africa.
- Native Hawaiian or Other Pacific Islander: A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
- White: A person having origins in any of the original people of Europe, the Middle East, or North Africa.
 - Some other race alone: Use this category for instances in which the client does not identify with any category above or whose origin group, because of area custom, is regarded as a racial class distinct from the above categories (do not use this category for clients indicating multiple or mixed races).
 - Two or more races: Use this code when the state data system allows multiple race selection and more than one race is indicated.

Value	Label	Frequency	%
1	American Indian/Alaska Native	101,534	1.6%
2	Asian	90,503	1.4%
3	Black or African American	1,241,968	19.0%
4	Native Hawaiian or Other Pacific Islander	15,333	0.2%
5	White	3,887,102	59.4%
6	Some other race alone/two or more races	643,081	9.8%
-9	Missing/unknown/not collected/invalid	565,282	8.6%
	Total	6,544,803	100%

GENDER: Sex

Identifies the client's most recent reported sex at the end of the reporting period.

Value	Label	Frequency	%
1	Male	3,153,389	48.2%
2	Female	3,373,844	51.5%
-9	Missing/unknown/not collected/invalid	17,570	0.3%
	Total	6,544,803	100%

SPHSERVICE: State psychiatric hospital services

This field identifies whether a client received services from any SMHA-funded and SMHA-operated organizations operated as hospitals that provide primarily inpatient care to persons with mental illnesses from a specific geographical area and/or statewide.

Value	Label	Frequency	%
1	Served in a state psychiatric hospital	125,264	1.9%
2	Not served in a state psychiatric hospital	6,419,539	98.1%
	Total	6,544,803	100%

CMPSERVICE: SMHA-funded/operated community-based program

This field identifies whether a client received services from any Community Mental Health Centers (CMHCs), outpatient clinics, partial care organizations, partial hospitalization programs, Program of Assertive Community Treatment (PACT) programs, consumer run programs (including Club Houses and drop-in centers), and all community support programs (CSP).

Value	Label	Frequency	%
1	Served in SMHA-funded/operated community-based program	6,375,362	97.4%
2	Not served in SMHA-funded/operated community-based program	169,441	2.6%
	Total	6,544,803	100%

OPISERVICE: Other psychiatric inpatient

This field identifies whether a client received services from a private provider or medical provider licensed and/or contracted through the SMHA.

Value	Label	Frequency	%
1	Served in 'other psychiatric inpatient center'	265,021	4.0%
2	Not served in 'other psychiatric inpatient center'	6,279,782	96.0%
	Total	6,544,803	100%

RTCSERVICE: Residential treatment center

This field identifies whether a client received services from an organization not licensed as a psychiatric hospital, the primary purpose of which is the provision of individually planned programs of mental health treatment services in conjunction with residential care for children and youth, and in some cases, adult care.

Value	Label	Frequency	%
1	Served in a residential treatment center	75,655	1.2%
2	Not served in a residential treatment center	6,469,148	98.8%
	Total	6,544,803	100%

IJSSERVICE: Institutions under the justice system

This field identifies whether a client received mental health services in a jail, prison, juvenile detention center, etc.

Value	Label	Frequency	%
1	Served by an institution under the justice system	72,645	1.1%
2	Not served by any institution under the justice system	6,472,158	98.9%
	Total	6,544,803	100%

MH1: Mental health diagnosis one

Specifies the client's current first mental health diagnosis during the reporting period.

Value	Label	Frequency	%
1	Trauma- and stressor-related disorders	877,490	13.4%
2	Anxiety disorders	698,160	10.7%
3	Attention deficit/hyperactivity disorder (ADHD)	440,138	6.7%
4	Conduct disorders	85,356	1.3%
5	Delirium/dementia disorders	16,768	0.3%
6	Bipolar disorders	592,563	9.1%
7	Depressive disorders	1,461,442	22.3%
8	Oppositional defiant disorders	108,736	1.7%
9	Pervasive developmental disorders	57,825	0.9%
10	Personality disorders	47,582	0.7%
11	Schizophrenia or other psychotic disorders	666,503	10.2%
12	Alcohol or substance use disorders	186,124	2.8%
13	Other disorders/conditions	495,788	7.6%
-9	Missing/unknown/not collected/invalid/no or deferred diagnosis	810,328	12.4%
	Total	6,544,803	100%

MH2: Mental health diagnosis two

Specifies the client's current second mental health diagnosis during the reporting period.

Value	Label	Frequency	%
1	Trauma- and stressor-related disorders	290,888	4.4%
2	Anxiety disorders	532,896	8.1%
3	Attention deficit/hyperactivity disorder (ADHD)	177,515	2.7%
4	Conduct disorders	31,667	0.5%
5	Delirium/dementia disorders	9,763	0.1%
6	Bipolar disorders	87,011	1.3%
7	Depressive disorders	291,173	4.4%
8	Oppositional defiant disorders	73,114	1.1%
9	Pervasive developmental disorders	28,698	0.4%
10	Personality disorders	77,702	1.2%
11	Schizophrenia or other psychotic disorders	61,265	0.9%
12	Alcohol or substance use disorders	84,004	1.3%
13	Other disorders/conditions	290,730	4.4%
-9	Missing/unknown/not collected/invalid/no or deferred diagnosis	4,508,377	68.9%
	Total	6,544,803	100%

MH3: Mental health diagnosis three

Specifies the client's current third mental health diagnosis during the reporting period.

Value	Label	Frequency	%
1	Trauma- and stressor-related disorders	71,380	1.1%
2	Anxiety disorders	93,355	1.4%
3	Attention deficit/hyperactivity disorder (ADHD)	49,553	0.8%
4	Conduct disorders	9,764	0.1%
5	Delirium/dementia disorders	2,327	0.0%
6	Bipolar disorders	20,407	0.3%
7	Depressive disorders	55,185	0.8%
8	Oppositional defiant disorders	18,431	0.3%
9	Pervasive developmental disorders	8,239	0.1%
10	Personality disorders	36,960	0.6%
11	Schizophrenia or other psychotic disorders	11,483	0.2%
12	Alcohol or substance use disorders	21,549	0.3%
13	Other disorders/conditions	67,958	1.0%
-9	Missing/unknown/not collected/invalid/no or deferred diagnosis	6,078,212	92.9%
	Total	6,544,803	100%

SUB: Substance use diagnosis

Specifies the client's substance use diagnosis that is current during the reporting period. The state should report the most recent substance use diagnosis.

Value	Label	Frequency	%
1	Alcohol-induced disorder	14,138	0.2%
2	Alcohol intoxication	12,229	0.2%
3	Substance-induced disorder	41,395	0.6%
4	Alcohol dependence	175,934	2.7%
5	Cocaine dependence	34,267	0.5%
6	Cannabis dependence	103,107	1.6%
7	Opioid dependence	148,275	2.3%
8	Other substance dependence	174,031	2.7%
9	Alcohol abuse	69,630	1.1%
10	Cocaine abuse	14,469	0.2%
11	Cannabis abuse	93,367	1.4%
12	Opioid abuse	14,961	0.2%
13	Other substance related conditions	58,435	0.9%
-9	Missing/unknown/not collected/invalid/no or deferred diagnosis	5,590,565	85.4%
	Total	6,544,803	100%

MARSTAT: Marital status

Identifies the client's marital status.

- Never married: Includes clients who are single or whose only marriage was annulled.
- Now married: Includes married couples, those living together as married, living with partners, or cohabitating.
- Separated: Includes those legally separated or otherwise absent from spouse because of marital discord.
- Divorced, widowed.

Value	Label	Frequency	%
1	Never married	2,839,593	43.4%
2	Now married	409,716	6.3%
3	Separated	162,393	2.5%
4	Divorced, widowed	478,380	7.3%
-9	Missing/unknown/not collected/invalid	2,654,721	40.6%
	Total	6,544,803	100%

SMISED: SMI/SED status

Indicates whether the client has serious mental illness (SMI) or serious emotional disturbance (SED) using the state definition. Use the most recent available status at the end of the reporting period.

Value	Label	Frequency	%
1	SMI	3,345,411	51.1%
2	SED and/or at risk for SED	1,422,360	21.7%
3	Not SMI/SED	1,462,189	22.3%
-9	Missing/unknown/not collected/invalid	314,843	4.8%
	Total	6,544,803	100%

SAP: Substance use problem

Specifies the client's substance use problem based on a substance use diagnosis and/or using other identification method such as substance use screening results, enrollment in a substance use program, substance use survey, service claims information, or other related sources of data.

Value	Label	Frequency	%
1	Yes	1,574,032	24.1%
2	No	4,180,339	63.9%
-9	Missing/unknown/not collected/invalid	790,432	12.1%
	Total	6,544,803	100%

EMPLOY: Competitive employment status (aged 16 years and older) at discharge or end of the reporting period

Specifies the client's employment status at discharge (for new clients) or the most recent available employment status at the end of the reporting period (for continuing clients). This data element is reported for all clients (16 years old and over) who are receiving services in non-institutional setting. Institutional settings include correctional facilities like prison, jail, detention centers, and mental health care facilities like state hospitals, other psychiatric inpatient facilities, nursing homes, or other institutions that keep a person, otherwise able, from entering the labor force.

- Full-time: Use state definition for full time employment; includes members of the Armed Forces, and clients in full-time Supported Employment.
- Part-time: Use state definition for part time; includes clients in part-time Supported Employment.
- Employed full-time/part-time not differentiated (temporary code).
- Unemployed: Defined as actively looking for work or laid off from job (and awaiting to be recalled) in the past 30 days.
- Not in labor force: Defined as not employed and not actively looking for work during the past 30 days (i.e. people not interested to work or people who have been discouraged to look for work).

Value	Label	Frequency	%
1	Full-time	270,441	4.1%
2	Part-time	175,245	2.7%
3	Employed full-time/part-time not differentiated	100,906	1.5%
4	Unemployed	668,016	10.2%
5	Not in labor force	1,142,334	17.5%
-9	Missing/unknown/not collected/invalid	4,187,861	64.0%
	Total	6,544,803	100%

DETNLF: Detailed 'not in labor force' category

This field gives more detailed information about those clients who are coded as 'not in labor force' for employment status (EMPLOY).

Value	Label	Frequency	%
1	Retired, disabled	507,960	7.8%
2	Student	185,648	2.8%
3	Homemaker	40,863	0.6%
4	Sheltered/non-competitive employment	11,837	0.2%
5	Other	396,026	6.1%
-9	Missing/unknown/not collected/invalid	5,402,469	82.5%
	Total	6,544,803	100%

VETERAN: Veteran status

This field specifies whether the client has served in the uniform services (Army, Navy, Air Force, Marine Corps, Coast Guard, Public Health Service Commissioned Corps, Coast and Geodetic Survey, etc.)

Guidelines: A veteran is a person 16 years or over who has served (even for a short time), but is not now serving, on active duty in the U.S. Army, Navy, Air Force, Marine Corps, Coast Guard, or Commissioner Corps of the U.S. Public Health Service or the National Oceanic and Atmospheric Administration, or who served as a Merchant Marine seaman during World War II. Individuals who served in the National Guard or Military Reserves are classified as veterans only if they have ever been called or ordered to active duty (excluding the 4-6 months of initial training and yearly summer camps).

Value	Label	Frequency	%
1	Yes	80,399	1.2%
2	No	2,487,598	38.0%
-9	Missing/unknown/not collected/invalid	3,976,806	60.8%
	Total	6,544,803	100%

LIVARAG: Residential status - at discharge or end of reporting period

Specifies client's residential status at time of discharge or end of reporting period (continuing clients).

- Experiencing homelessness: Person has no fixed address; includes homeless, shelters.
- Private residence: Includes independent living adults, dependent living adults (adult clients living in a house, apartment, or other similar dwellings and are heavily dependent on others for daily living assistance), and children living in a private residence, regardless of living arrangement.
- Other: Clients living in a foster home or a care center, residential care facility, crisis residence, institutional care facility, jail and/or correctional facility, or other residential status.

Value	Label	Frequency	%
1	Experiencing Homelessness	173,313	2.6%
2	Private residence	3,564,564	54.5%
3	Other	429,276	6.6%
-9	Missing/unknown/not collected/invalid	2,377,650	36.3%
	Total	6,544,803	100%

NUMMHS: Number of mental health diagnoses reported

Calculates the number of valid mental health diagnoses (maximum of three) that are reported for each client. For instance, the value of this variable will be 3 if nonmissing values are provided for all three mental health diagnoses (MH1, MH2, and MH3).

Value	Label	Frequency	%
0	0	810,328	12.4%
1	1	3,698,038	56.5%
2	2	1,569,857	24.0%
3	3	466,580	7.1%
	Total	6,544,803	100%

TRAUSTREFLG: Trauma- or stressor-related disorder reported

Flag records if a trauma- or stressor-related disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	5,305,045	81.1%
1	Disorder reported	1,239,758	18.9%
	Total	6,544,803	100%

ANXIETYFLG: Anxiety disorder reported

Flag records if an anxiety disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	5,220,392	79.8%
1	Disorder reported	1,324,411	20.2%
	Total	6,544,803	100%

ADHDFLG: Attention deficit/hyperactivity disorder reported

Flag records if attention deficit/hyperactivity disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	5,877,597	89.8%
1	Disorder reported	667,206	10.2%
	Total	6,544,803	100%

CONDUCTFLG: Conduct disorder reported

Flag records if a conduct disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	6,418,016	98.1%
1	Disorder reported	126,787	1.9%
	Total	6,544,803	100%

DELIRDEMFLG: Delirium/dementia disorder reported

Flag records if delirium/dementia disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	6,515,945	99.6%
1	Disorder reported	28,858	0.4%
	Total	6,544,803	100%

BIPOLARFLG: Bipolar disorder reported

Flag records if a bipolar disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	5,844,822	89.3%
1	Disorder reported	699,981	10.7%
	Total	6,544,803	100%

DEPRESSFLG: Depressive disorder reported

Flag records if a depressive disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	4,737,003	72.4%
1	Disorder reported	1,807,800	27.6%
	Total	6,544,803	100%

ODDFLG: Oppositional defiant disorder reported

Flag records if oppositional defiant disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	6,344,522	96.9%
1	Disorder reported	200,281	3.1%
	Total	6,544,803	100%

PDDFLG: Pervasive developmental disorder reported

Flag records if a pervasive developmental disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	6,450,041	98.6%
1	Disorder reported	94,762	1.4%
	Total	6,544,803	100%

PERSONFLG: Personality disorder reported

Flag records if a personality disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	6,382,559	97.5%
1	Disorder reported	162,244	2.5%
	Total	6,544,803	100%

SCHIZOFLG: Schizophrenia or other psychotic disorder reported

Flag records if schizophrenia or other psychotic disorders were reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	5,805,552	88.7%
1	Disorder reported	739,251	11.3%
	Total	6,544,803	100%

ALCSUBFLG: Alcohol or substance-related disorder reported

Flag records if an alcohol or substance use disorder was reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	6,253,126	95.5%
1	Disorder reported	291,677	4.5%
	Total	6,544,803	100%

OTHERDISFLG: Other mental disorder reported

Flag records if other mental disorders were reported in the first, second, or third mental health diagnosis field.

Value	Label	Frequency	%
0	Disorder not reported	5,690,394	86.9%
1	Disorder reported	854,409	13.1%
	Total	6,544,803	100%

STATEFIP: Reporting state code

Identifies the reporting state.

DIVISION: Census division

Census divisions are groupings of states that are subdivisions of the four Census regions. There are nine divisions, which the Census Bureau adopted in 1910 for the presentation of data. Also included are other jurisdictions as a tenth category. The divisions, and the states and other jurisdictions included in them, are:

- Other jurisdictions: Puerto Rico, Republic of Palau, and the Commonwealth of the Northern Mariana Islands.
- New England: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
- Middle Atlantic: New Jersey, New York, and Pennsylvania.
- East North Central: Illinois, Indiana, Michigan, Ohio, and Wisconsin.
- West North Central: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.
- South Atlantic: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.
- East South Central: Alabama, Kentucky, Mississippi, and Tennessee.
- West South Central: Arkansas, Louisiana, Oklahoma, and Texas.
- Mountain: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.
- Pacific: Alaska, California, Hawaii, Oregon, and Washington.

Value	Label	Frequency	%
0	Other jurisdictions	4,473	0.1%
1	New England	184,370	2.8%
2	Middle Atlantic	1,071,901	16.4%
3	East North Central	1,082,519	16.5%
4	West North Central	689,183	10.5%
5	South Atlantic	821,994	12.6%
6	East South Central	469,034	7.2%
7	West South Central	635,386	9.7%
8	Mountain	521,422	8.0%
9	Pacific	1,064,521	16.3%
	Total	6,544,803	100%

REGION: Census region

Geographic regions are based on divisions used by the U.S. Census Bureau, with the addition of other jurisdictions, which are not included in any Census region:

- Other jurisdictions: Puerto Rico, Republic of Palau, and the Commonwealth of the Northern Mariana Islands.
- Northeast: New England Division (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont) and Middle Atlantic Division (New Jersey, New York, Pennsylvania).
- Midwest: East North Central Division (Illinois, Indiana, Michigan, Ohio, Wisconsin) and West North Central Division (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota).
- South: South Atlantic Division (Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia), East South Central Division (Alabama, Kentucky, Mississippi, Tennessee), and West South Central Division (Arkansas, Louisiana, Oklahoma, Texas).
- West: Mountain Division (Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming) and Pacific Division (Alaska, California, Hawaii, Oregon, Washington).

Value	Label	Frequency	%
0	Other jurisdictions	4,473	0.1%
1	Northeast	1,256,271	19.2%
2	Midwest	1,771,702	27.1%
3	South	1,926,414	29.4%
4	West	1,585,943	24.2%
	Total	6,544,803	100%

Appendix A. MH-CLD Variable Information (Alphabetical Order)

Variable	Туре	Length	Label	
ADHDFLG	Numeric	8	Attention deficit/hyperactivity disorder reported	
AGE	Numeric	8	Age (recoded)	
ALCSUBFLG	Numeric	8	Alcohol or substance-related disorder reported	
ANXIETYFLG	Numeric	8	Anxiety disorder reported	
BIPOLARFLG	Numeric	8	Bipolar disorder reported	
CASEID	Numeric	8	Case identification number	
CMPSERVICE	Numeric	8	SMHA-funded/operated community-based program	
CONDUCTFLG	Numeric	8	Conduct disorder reported	
DELIRDEMFLG	Numeric	8	Delirium/dementia disorder reported	
DEPRESSFLG	Numeric	8	Depressive disorder reported	
DETNLF	Numeric	8	Detailed 'not in labor force' category	
DIVISION	Numeric	8	Census division	
EDUC	Numeric	8	Education	
EMPLOY	Numeric	8	Competitive employment status (aged 16 years and older) at discharge or end of the reporting period	
ETHNIC	Numeric	8	Hispanic or Latino origin (ethnicity)	
GENDER	Numeric	8	Sex	
IJSSERVICE	Numeric	8	Institutions under the justice system	
LIVARAG	Numeric	8	Residential status — at discharge or end of reporting period	
MARSTAT	Numeric	8	Marital status	
MH1	Numeric	8	Mental health diagnosis one	
MH2	Numeric	8	Mental health diagnosis two	
мнз	Numeric	8	Mental health diagnosis three	
NUMMHS	Numeric	8	Number of mental health diagnoses reported	
ODDFLG	Numeric	8	Oppositional defiant disorder reported	
OPISERVICE	Numeric	8	Other psychiatric inpatient	
OTHERDISFLG	Numeric	8	Other mental disorder reported	
PDDFLG	Numeric	8	Pervasive developmental disorder reported	
PERSONFLG	Numeric	8	Personality disorder reported	
RACE	Numeric	8	Race	
REGION	Numeric	8	Census region	
RTCSERVICE	Numeric	8	Residential treatment center	
SAP	Numeric	8	Substance use problem	
SCHIZOFLG	Numeric	8	Schizophrenia or other psychotic disorder reported	
SMISED	Numeric	8	SMI/SED status	
SPHSERVICE	Numeric	8	State psychiatric hospital services	

Variable	Туре	Length	Label
STATEFIP	Numeric	8	Reporting state code
SUB	Numeric	8	Substance use diagnosis
TRAUSTREFLG	Numeric	8	Trauma- and stressor-related disorder reported
VETERAN	Numeric	8	Veteran status
YEAR	Numeric	8	Reporting period

Appendix B. Variable Recode Table

Variable	Original codes	Recodes
AGE	Continuous (0-85)	1 0-11 years old
Age at midpoint of the		2 12–14 years old
state's elected		3 15–17 years old
reporting period.		4 18–20 years old
		5 21–24 years old
		6 25–29 years old
		7 30-34 years old
		8 35-39 years old
		9 40-44 years old
		10 45-49 years old
		11 50-54 years old
		12 55-59 years old
		13 60-64 years old
		14 65 years and older
ETHNIC	1 Hispanic origin	1 Mexican
Ethnicity (Hispanic origin)	11 Puerto Rican	2 Puerto Rican
	12 Mexican	3 Other Hispanic or Latino origin
	13 Cuban	4 Not of Hispanic or Latino origin
	14 Other specific Hispanic	
	2 Not of Hispanic origin	
MARSTAT	1 Never married	1 Never married
Marital status	2 Married/Living as a couple	2 Now married
	3 Separated	3 Separated
	4 Divorced	4 Divorced, widowed
	5 Widowed	

Variable		Original codes		Recodes

Appendix C. Technical Notes

The MH-CLD public use file contains several variables created by combining or recoding original variables submitted by states. The following notes describe how these variables are created or recoded.

Flag variables for mental health diagnoses:

- If first, second, or third mental health diagnosis is 1 *trauma- or stressor-related disorder*, then trauma- or stressor-related disorder flag is 1;
- if first, second, or third mental health diagnosis is 2 *anxiety disorder*, then anxiety disorder flag is 1;
