Terms of Use
These data are distributed under the following terms of use; by continuing past this page, you signify agreement to comply with the requirements below:

Privacy of Study Respondents
Any intentional identification of an individual or organization, or unauthorized disclosure of identifiable information, violates the promise of confidentiality given to the providers of the information. Disclosure of identifiable information may also be punishable under federal law. Therefore, users of data agree to:

Use these datasets solely for research or statistical purposes, and not for investigation or re-identification of specific individuals or organizations.

Make no use of the identity of any individual discovered inadvertently, and report any such discovery to SAMHSA (BHSIS_HelpDesk@eagletechva.com).

Public Domain Notice
All material appearing in this document is in the public domain and may be reproduced or copied without permission from SAMHSA. Citation of the source is appreciated. However, this publication may not be reproduced or distributed for a fee without specific, written authorization of the Office of Communications, SAMHSA, U.S. Department of Health and Human Services.

Recommended Citation

Authors that use these data are encouraged to send citations of their publications to SAMHSA for inclusion in a database of related work (BHSIS_HelpDesk@eagletechva.com).

Disclaimers
Data users acknowledge that SAMHSA and Eagle Technologies, Inc., bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

SAMHSA complies with applicable federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. SAMHSA cumple con las leyes federales de derechos civiles aplicables y no discrimina por motivos de raza, color, nacionalidad, edad, discapacidad o sexo.
Violations

If SAMHSA determines these terms of use agreement has been violated, possible sanctions include:

- report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user’s institution;

- report of the violation to the Federal Office for Human Research Protections, if the confidentiality of human subjects has been violated;

- report of the violation of federal law to the United States Attorney General for possible prosecution;

- court-awarded payments of damages to any individual(s) or organization(s) harmed by the breach of confidential data.
Description of the National Mental Health Services Survey (N-MHSS)

The 2019 National Mental Health Services Survey (N-MHSS) was conducted from March 2019 through November 2019. The N-MHSS collects information from all known facilities in the United States, both public and private, that provide mental health treatment services to people with mental illness.\(^1\) The Center for Behavioral Health Statistics and Quality (CBHSQ) of the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs the N-MHSS.

The N-MHSS provides a mechanism for quantifying the dynamic character and composition of the U.S. mental health treatment delivery system. It is the only source of national and state-level data on the mental health services delivery system reported by both publicly and privately-operated specialty mental health care facilities. The N-MHSS is designed to collect data on the location, characteristics, and utilization of organized mental health treatment service providers for facilities within the scope of the survey throughout the 50 states, the District of Columbia, and other U.S. jurisdictions.\(^2\) The N-MHSS complements, but does not duplicate, the information collected through SAMHSA’s survey of substance abuse treatment facilities, the National Survey of Substance Abuse Treatment Services (N-SSATS).

The objective of the N-MHSS is to collect data that can be used to:

- assist SAMHSA and state and local governments in assessing the nature and extent of services provided in state-funded, state-operated, and private non-profit and for-profit mental health treatment facilities, and in forecasting mental health treatment resource requirements;
- update SAMHSA’s Inventory of Behavioral Health Services (I-BHS), an inventory of all known mental health and substance abuse treatment facilities in the United States, which can be used as a frame for future surveys of these facilities;
- describe the nature and scope of mental health treatment services and conduct comparative analyses for the nation and states; and
- update the information in the mental health component of SAMHSA’s online Behavioral Health Treatment Services Locator, which includes a searchable database of public and private facilities for the provision of mental health treatment. The Locator is available at: https://findtreatment.samhsa.gov

\(^1\) In this report, entities responding to the N-MHSS are referred to as “facilities.”
\(^2\) In the 2019 N-MHSS, other jurisdictions included American Samoa, Guam, Northern Mariana Islands, and the U.S. Virgin Islands.
Data Collection Procedures for the 2019 N-MHSS

Field period and reference date

The field period for the 2019 N-MHSS, which included mailing and data collection operations, ran from March 26, 2019, through November 30, 2019. The reference date was April 30, 2019.

Survey universe

The 2019 N-MHSS survey universe included 14,936 facilities across the United States and other jurisdictions. Most facilities in the 2019 N-MHSS frame were identified from the updated database produced after fielding the 2010 and 2014 N-MHSS, and further supplemented by the 2015, 2016, 2017 and 2018 mental health augmentation and new facilities that states requested be added to the I-BHS.

Below are the major activities undertaken to make sure SAMHSA has the most complete universe of facilities possible:

- The updated survey database is comprised of (1) those facilities that were included in the previous survey and are in-scope, and (2) newly identified facilities that became known during the course of the previous survey and are identified as eligible. Facilities that closed or were subsequently found to be out-of-scope are excluded.

- State mental health authorities (SMHAs) are contacted annually and asked to either (1) update and edit their state listing of known facilities, or (2) submit a new state listing of known facilities, using the I-BHS online, which has been used by the state substance abuse agencies (SSAs) for a number of years. The information collected through these state listings is processed and cross-checked with the database of facilities in the I-BHS; newly identified facilities are screened for eligibility before being added to the survey database.

- Augmentation includes a number of activities undertaken by our contractor staff. Contact is made on an annual basis to obtain current facility listings from the American Business Index (ABI), the American Hospital Association (AHA), the U.S. Department of Veterans Affairs (VA), the Centers for Medicare and Medicaid Services (CMS), and a number of national behavioral health organizations/associations, such as the National Council for Community Behavioral Healthcare, the National Association of Psychiatric Health Systems, and the American Association of Children’s Residential Centers (AACRC). These listings are cross-checked against the existing I-BHS database and any new facilities are screened (through an augmentation screener questionnaire conducted through phone interview) for eligibility to be included in the database for the upcoming survey. The augmentation screener is also used to screen facilities that were newly identified through the previous survey and through the state listings.
When new, eligible facilities are identified between surveys, they are contacted by telephone to provide basic facility information for a “between survey update.” Facilities that meet the requirements of being active, providing mental health treatment services as defined by SAMHSA, and responding to the annual N-MHSS survey are listed on SAMHSA’s Behavioral Health Treatment Services Locator and in the National Directory of Mental Health Treatment Facilities.

Survey coverage

The following types of mental health treatment facilities were included in the 2019 N-MHSS:

- **Psychiatric hospitals** are facilities licensed and operated as either state/public psychiatric hospitals or as state-licensed private psychiatric hospitals that primarily provide 24-hour inpatient care to persons with mental illness. They may also provide 24-hour residential care and/or less-than-24-hour care (i.e., outpatient, partial hospitalization/day treatment), but these additional service settings are not requirements.

- **General hospitals with a separate inpatient psychiatric unit** are licensed general hospitals (public or private) that provide inpatient mental health services in separate psychiatric units. These units must have specifically allocated staff and space for the treatment of persons with mental illness. The units may be located in the hospital itself or in a separate building that is owned by the hospital.

- **Veterans Administration (VA) medical centers** are facilities operated by the U.S. Department of Veterans Affairs, including general hospitals with separate psychiatric inpatient units, residential treatment programs, and/or psychiatric outpatient clinics.

- **Partial hospitalization/day treatment mental health facilities** provide only partial day mental health services to ambulatory clients, typically in sessions of three or more hours on a regular schedule. A psychiatrist generally assumes the medical responsibility for all clients and/or for the direction of their mental health treatment.

- **Outpatient mental health facilities** provide only outpatient mental health services to ambulatory clients, typically for less than three hours at a single visit. A psychiatrist generally assumes the medical responsibility for all clients and/or for the direction of their mental health treatment.

- **Residential treatment centers (RTCs) for children** are facilities not licensed as psychiatric hospitals that primarily provide individually planned programs of mental health treatment in a residential care setting for children under age 18. (Some RTCs for children may also treat young adults.) RTCs for children must have a clinical program that is directed by a psychiatrist, psychologist, social worker, or psychiatric nurse who has a master’s or doctoral degree.

- **Residential treatment centers (RTCs) for adults** are facilities not licensed as psychiatric hospitals that primarily provide individually planned programs of mental health treatment in a residential care setting for adults.
• *Multi-setting mental health facilities*\(^3\) provide mental health services in two or more service settings (non-hospital residential, plus either outpatient and/or partial hospitalization/day treatment), and are not classified as a psychiatric hospital, general hospital, medical center, or residential treatment center.

• *Community mental health centers* (CMHCs) provide either (1) outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of its mental health service area who have been discharged from inpatient treatment at a mental health facility; (2) 24-hour emergency care services; (3) day treatment or other partial hospitalization services, or psychosocial rehabilitation services; or (4) screening for patients being considered for admission to state mental health facilities to determine the appropriateness of the admission. To be classified as a CMHC, a facility must meet applicable licensing or certification requirements for CMHCs in the state in which it is located.

• *Other types of residential treatment facilities* refers to facilities not licensed as psychiatric hospitals. The primary purpose of other types of residential treatment facilities is to provide individually planned programs of mental health treatment services in a residential care setting; such facilities are not specifically for children or adults only.

• *Other* refers to another type of hospital or mental health facility not defined in the categories above.

*Exclusions*

The survey universe for the 2019 N-MHSS excluded: (1) Department of Defense (DoD) military treatment facilities; (2) individual private practitioners or small group practices not licensed as a mental health clinic or center; and (3) jails or prisons.

Facilities are not eligible for inclusion in the survey universe if they only provide one or more of the following services: crisis intervention services, psychosocial rehabilitation, cognitive rehabilitation, intake, referral, mental health evaluation, health promotion, psychoeducational services, transportation services, respite services, consumer-run/peer support services, housing services, or legal advocacy. Residential facilities whose primary function is not to provide specialty mental health treatment services are also not eligible for inclusion in the survey universe for the N-MHSS.

\(^3\) The classification of psychiatric hospital, general hospital, medical center, or residential treatment center—any of which can offer mental health services in two or more service settings—takes precedence over a multi-setting classification.
Content

The 2019 N-MHSS instrument, which appears in its print format as Appendix A, is an eight-page document with 32 numbered questions. Topics included:

- facility type, operation, and primary treatment focus;
- facility treatment characteristics (e.g., settings of care; mental health treatment approaches, supportive services and practices, and dedicated or exclusively designed programs or groups offered; crisis intervention team availability, and seclusion and restraint practices);
- facility operating characteristics (e.g., age groups accepted; availability of treatment services provided in non-English languages and in sign language for the deaf and hard-of-hearing; and smoking policy);
- facility management characteristics (e.g., computerized functionality; licensure, certification, and accreditation; standard operating procedures; and sources of payment and funding).

Data collection

There were three data collection modes employed: a secure web-based questionnaire, a paper questionnaire sent by mail, and a computer-assisted telephone interview (CATI). Approximately four weeks before the survey reference date (April 30, 2019), SAMHSA mailed letters to the attention of the facility directors of all eligible facilities to alert them to expect the survey and to request their participation in the N-MHSS (Appendix B). The letter also served to update records with new address information received from the U.S. Postal Service. A data collection packet (including SAMHSA cover letter, state-specific letter of support, information on completing the survey on the web, and fact sheet of frequently asked questions) was mailed to each facility on April 30, 2019. The web-based survey also became available at the same time. At this point, each facility had the option of completing the questionnaire via the secure survey website or asking for a paper questionnaire to complete and return via postal mail. In August 2019, another, similar packet was sent to non-responding facilities, this time including a copy of the questionnaire, a definitions packet, and a postage-paid return envelope.

During the data collection phase, contract personnel were available by telephone to answer facilities’ questions concerning the survey. Facilities completing the questionnaire on the Internet had access to hyperlinks to an information site containing definitions of the survey elements. Multiple reminder letters were sent to non-respondents over the course of the data collection period via fax, mail, and e-mail. To increase the survey response rate, state mental health agency representatives were contacted during the data collection period to inform them of their state’s progress and to request additional help in encouraging responses. Blaise®-to-web follow-up (assisted telephone interviews) of non-respondents began in August 2019 and ended in late November 2019.

Eligibility and unit response rate

Table 1.1 presents a summary of eligibility and response rate information. Of the 14,936 mental health treatment facilities in the survey, 6 percent were found to be ineligible for the survey because they did not provide mental health treatment services; had a primary treatment focus of substance
abuse services or general health care; provided treatment for incarcerated persons only (i.e., in jails or prisons); were an individual or small group mental health practice not licensed or certified as a mental health center or clinic; or were closed.

SOURCE: Center for Behavioral Health Statistics and Quality, Substance Abuse and Mental Health Services Administration, National Mental Health Services Survey (N-MHSS), 2019.

Facility Reporting and Selection for the 2019 N-MHSS Report

Of the 14,013 facilities eligible for the survey, 91 percent completed the survey, including 240 facilities that did not provide direct mental health treatment services [Table 1.1]. (These 240 facilities, which provided administrative services only, were excluded from the report, but have been included in SAMHSA’s online Behavioral Health Treatment Services Locator.) After excluding the 240 facilities that provided only administrative services, data from 12,472 eligible respondent facilities were included in the 2019 N-MHSS report. Of the respondents that were eligible for the report, 94 percent completed the survey on the web, 1 percent through the mail, and 5 percent on the telephone.

Quality Assurance

All completed mail questionnaires underwent a manual review for consistency and missing data. Calls to facilities clarified questionable responses and obtained missing data. After data entry, automated quality assurance reviews were conducted. The reviews incorporated the rules used in manual editing plus consistency checks not readily identified by manual review. The web-based questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses on critical items. The CATI questionnaire was similarly programmed.
Response Rates

The final unit response rate among facilities eligible for the survey was 91 percent. Extensive follow-up during data collection and careful editing maximized item response; the item response rates averaged approximately 100 percent across all 149 separate items.

Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2019 N-MHSS. Some general issues are listed below. Considerations and limitations of specific data items are discussed where the data are presented.

- The N-MHSS is a voluntary survey, and while every effort is made to obtain responses from all known mental health treatment facilities within the scope of the survey, some facilities did not respond. There was no adjustment for the 9 percent facility non-response.

- Multiple responses were allowed for certain questionnaire items (e.g., services provided in non-English languages and type of payment or insurance accepted for mental health treatment services). Tabulations of data for these items include the total number of facilities reporting each response category.
Note: The number in parentheses that follows each variable’s headline description, e.g. “(Q.7),” denotes the corresponding question and response in the survey instrument from which the variable is drawn.
**CASEID: Case identification number**

Program generated case (record) identifier. A frequency distribution of this variable is not shown; each case has a unique value generated for identification purposes.
