Processor Notes
NHSDA 1998

- 1) The codebook introduction contains several references to the SAS Windows system version of the public use data file that was originally created by the data producers. To provide the data to users in a format that is neither system- nor platform-specific, the data file is in ASCII text format with SAS and SPSS data definition statements.
- 2) All system-missing values (denoted as "." in the frequencies) were recoded to "99" in the data for consistency with coding in past NHSDAs.
- 3) Variables ending in ...NEWA through ...NEWE (e.g., HALNEWA) represent written responses to open-ended questions regarding use of specific drugs. This resulted in some instances of incorrectly classified drugs.
- 4) IRHSGRAD (high school graduation variable) does not distinguish between respondents aged 12-17 years and those 18 and older. Accordingly, most respondents aged 12-17 years are included in the "No" category.

INTRODUCTION AND DESCRIPTION OF THE 1998 NATIONAL HOUSEHOLD SURVEY ON DRUG ABUSE

Introduction

This codebook provides documentation for the 1998 National Household Survey on Drug Abuse (NHSDA) public use file. The 1998 NHSDA public use file was prepared for use with the Statistical Analysis System (SAS) as a SAS dataset. The variable names in this codebook are the SAS variable names that appear in the dataset. The public use file is provided to users on a compact disc (i.e., a CD-ROM).

For each variable on the 1998 public use file, this codebook provides the SAS variable name, a description of the variable, the interview instrumentation source, value codes and their meanings, and a univariate frequency distribution. Most of the variables originated as questionnaire or answer sheet items. For created variables, the source variables and recoding specifications are provided, if space allows. In addition, case identification, sampling, and data collection variables are included on the file and documented in this codebook.

This edition of the 1998 public release file does not contain data collected on the Parenting Experiences answer sheet (#21) and the questionnaire roster (QD-47) contained on the "Non-Core" Demographics section, nor does this file include various recoded variables that are typically created from the roster data and contained on past public release files. All the necessary processing of these data and weight calculations for use of these data were not complete at the time of this release. An updated version of the 1998 public release file to be released at a later date will contain additional questionnaire data, created variables using these data, and additional weights.

Overview of the NHSDA

The 1998 NHSDA is the 18th in a series, the primary purpose of which is to measure the prevalence and correlates of drug use in the United States. This survey provides information about the use of illicit drugs, alcohol, and tobacco among members of the noninstitutionalized U.S. civilian population aged 12 or older. Surveys have been conducted periodically since 1971, with the most recent ones in 1979, 1982, 1985, 1988, and 1990 through 1997. Currently, public use files are available for 1979, 1982, 1985, 1988, 1990, 1991, 1992, 1993, 1994-A (old questionnaire), 1994-B (new questionnaire), 1995, 1996, and 1997.

The target population for the 1998 survey was the same as has been defined since the 1991 NHSDA: the civilian, noninstitutionalized population of the 50 States (including civilians living on military bases) who were 12 years of age or older at the time of the survey.

Before 1991, the NHSDA sample was drawn from the household population of the contiguous 48 States. Alaska and Hawaii were added to the sample population in 1991, as were residents of noninstitutional group quarters (e.g., college dormitories, group homes, civilians dwelling on military installations) and persons with no permanent residence (homeless people in shelters and residents of single rooms in hotels). In addition, six special-interest metropolitan statistical areas were oversampled. New questions were added in 1991 to collect data on treatment for drug use, illegal activities, and use of anabolic steroids; and the sets of questions about insurance and personal and family income sources and amounts were expanded. The 1992 and 1993 NHSDAs retained these innovations and were also designed to provide quarterly as well as annual estimates.

Although the design of the NHSDA has preserved continuity in assessing drug use throughout the survey series, it has been sufficiently flexible to permit implementation of special procedures and examination of special topics. A key feature of the NHSDA questionnaire is a core-supplement structure. A core set of

questions that are critical for basic trend measurement of prevalence rates remain in the survey every year and comprise the first part of the questionnaire. Supplemental questions, or modules, that can be revised, dropped, or added from year to year comprise the remainder of the questionnaire. The core consists of the initial demographic and health items and the first 12 answer sheets, ending with the sedatives answer sheet. Supplemental items include the remaining answer sheets and demographic and health questions. It should be mentioned that some of the supplemental portions of the questionnaire have remained in the survey, relatively unchanged, every year (e.g., insurance, income). Since 1988, additional information has also been gathered about the form of cocaine known as “crack” and about sharing needles for injection of drugs. Also, the consequences of use of various drugs have been given considerable attention since 1985.

In 1994, two questionnaires were used: an old questionnaire that retained all the core questions from the previous surveys, and a new questionnaire in which new questions on access to care and mental health were introduced. The 1994 survey also included a rural supplementary sample to obtain substance abuse prevalence estimates for rural areas in the United States. The 1995 NHSDA questionnaire retained the new questions on mental health and access to care that were introduced in the 1994-B (new questionnaire); questions on needs for treatment for drug or alcohol use and questions about criminal records were included under special topics. In 1996, the risk/availability of drugs section was re-introduced, and sections on driving behavior and personal behavior were added.

The 1997 questionnaire continued the risk/availability section along with new items about use of cigars, people present when respondents used marijuana or cocaine for the first time (if applicable), reasons for using marijuana or cocaine the first time, reasons for using marijuana or cocaine in the past year, reasons for discontinuing use of these two drugs (for lifetime but not past year users), and reasons why respondents never used these two drugs. The 1998 NHSDA also continued the risk/availability section and cigar use questions. Both the 1997 and 1998 NHSDAs had a series of questions that were asked only of respondents aged 12 to 17. These covered a variety of topics relevant to the lives and perceptions of young respondents that may be associated with substance use and related behaviors. A description of the 1998 survey, including more detailed information on sample issues, can be found in the following NHSDA reports:

- National Household Survey on Drug Abuse: Main Findings 1998. This report provides information on the prevalence of use and information on demographic correlates of use, frequency of use, patterns of use, problems from use, and perceptions of risk of use of illicit drugs, alcohol, and tobacco (DHHS Publication No. SMA 00-3381, NHSDA Series H-11).
- National Household Survey on Drug Abuse: Population Estimates 1998. This report provides estimates of the percentages and numbers of people in the noninstitutionalized U.S. civilian population aged 12 or older who had ever used illicit drugs, alcohol, and tobacco, as well as estimates of use in the past year and past month (DHHS Publication No. SMA 99-3327, NHSDA Series H-9).
- Summary of Findings from the 1998 National Household Survey on Drug Abuse. This report presents in tabular, graphical, and narrative bullet formats some key findings on illicit drug use prevalence by age and major demographic variables in 1998, and relative to other years (DHHS Publication No. SMA 99-3328, NHSDA Series H-10).

Strengths and Limitations of the NHSDA

The NHSDA is the only study that regularly produces estimates of drug use among civilian members of the noninstitutionalized population in the United States. The survey is an appropriate technique for estimating prevalence rates for use of different drugs because much drug use would not ordinarily come to the attention of administrative, medical, or correctional authorities and therefore would not be included in official statistics.

In-person interviews with a large national probability sample seem to be the best way to estimate drug use in virtually the entire population of the United States.

Although the NHSDA is useful for many purposes, it has certain limitations. First, the data are self-reports of drug use, and their value depends on respondents' truthfulness and memory. Although some experimental studies have established the validity of self-reported data in similar contexts and the NHSDA procedures were designed to encourage honesty and recall, some underreporting and overreporting may have taken place. Second, the survey is cross-sectional rather than longitudinal. That is, individuals were interviewed only once and were not followed for additional interviews. The surveys, therefore, provide an overview of the prevalence of drug use at specific points in time rather than a view of how drug use changes over time for specific individuals. Third, because the target population of the survey is defined as the noninstitutionalized civilian population of the United States, a small proportion (slightly less than 2%) of the population is excluded. The subpopulations excluded are members of the active-duty military and persons in institutional group quarters (e.g., hospitals, prisons, nursing homes, treatment centers). If the drug use of these groups differs from that of the noninstitutionalized civilian population, the NHSDA may provide slightly inaccurate estimates of drug use in the total population. This may be particularly true for prevalence estimates for rarely used drugs, such as heroin.

Survey Methodology

The respondent universe for the 1998 NHSDA was the civilian, noninstitutionalized population aged 12 years or older within the United States, including residents of noninstitutional group quarters (e.g., shelters, rooming houses, dormitories), as well as residents of civilian housing on military bases. Persons excluded from the universe included those with no fixed address, residents of institutional quarters (such as jails and hospitals), and active-duty military personnel. The survey used basically the same multistage area probability sample design that has been employed since the 1988 NHSDA. This design uses a composite size measure methodology and a specially designed within-dwelling selection procedure to ensure that desired sample sizes would be achieved for subpopulations defined by age and race/ethnicity. Oversampling was used to meet specified precision constraints for these subpopulations. As in the 1988 through 1997 NHSDAs, the 1998 NHSDA oversampled Hispanics in areas of high Hispanic concentration to reduce survey costs. Like the 1996 NHSDA, which used virtually the same segments surveyed in the 1995 NHSDA, the 1998 NHSDA basically revisited the 1997 NHSDA segment sample. Approximately 76% of the 1998 sample, or 2,030 segments, consisted of the unused members of the pairwise segment sample selected at the same time the 1998 segment samples were drawn. The remaining 24%, or 640 segments, were new segments either replacing 1998 segments with inadequate remaining dwelling unit sample sizes or segments representing newly defined noncertainty primary sampling units (PSUs). A combination of the pairwise sampling feature and the overlap feature helped reduce the sampling variance (i.e., of year-to-year difference estimates), as well as minimized field costs.

Similar to the 1997 NHSDA, the 1998 survey incorporated an Arizona and California supplemental sample large enough to yield defensible State-level estimates, in addition to contributing to national estimates. However, unlike the 1997 survey, the supplemental sample was included as part of the original design to allow for separate Arizona and California stratum definitions and was present in all four quarters of the survey.

As in previous NHSDAs, the basic sample design of the 1998 NHSDA involved five selection stages: the selection of PSUs (e.g., counties), the selection of subareas (blocks or block groups) within PSUs, the selection of listing units (housing units or individual dwelling units within noninstitutionalized group quarters that are occupied by one or more civilians) within these subareas, the selection of age domains (age groups 12 to 17, 18 to 25, 26 to 34, 35 to 49, and 50 or older) within sampled listing units, and the selection of eligible individuals within the sampled age domains. The following sections describe these selection stages. A more complete description of the sample design can be found in the 1998 *Methodological Resource Book* (OAS, in press).

Selection of Primary Sampling Units

The 1998 NHSDA used the same 115 PSUs selected for the 1995 through 1997 NHSDAs, 6 supplemental PSUs from Arizona and California, and an additional 16 noncertainty PSUs from 13 purposely selected States. These PSUs were selected to represent the Nation's total eligible population, including areas of high Hispanic concentration. The PSUs were defined as metropolitan areas, counties, groups of counties, Census tracts, and independent cities. The 115 PSUs in the national study comprised 43 certainty PSUs and 72 noncertainty PSUs. The 43 certainty PSUs were metropolitan areas with high Hispanic concentration that had been included in the NHSDA with certainty since 1988. The 72 noncertainty PSUs were selected with probability proportional to size (PPS) and minimal replacement to represent the balance of the Nation outside the 43 certainty PSUs. The national sample was supplemented by a PPS selection of four noncertainty PSUs from Arizona and two noncertainty PSUs from California. The additional 16 noncertainty PSUs were added in States with a small sample size to increase the reliability of estimates. Because the national sample provided representation for certainty PSUs in each State, no additional certainty PSUs were added to either sample.

The segments that formed the 43 certainty PSUs were partitioned into five strata:

- | | | |
|---|------------|---|
| C | Stratum 1: | Certainty-high-concentration Hispanic area segments. These segments had 71% or more Hispanics according to the 1990 Census. |
| C | Stratum 2: | Certainty-moderate-concentration Hispanic area segments. These segments had between 20% and 71% Hispanics according to the 1990 Census. |
| C | Stratum 3: | Certainty-low-concentration Hispanic area segments. These segments had fewer than 20% Hispanics but more than 2% of the combined Hispanic and black population according to the 1990 Census, and furthermore included fewer than 70% of the black population according to the 1990 Census. ¹ |
| C | Stratum 4: | Certainty-high-concentration black area segments. These segments had fewer than 20% Hispanics but more than 2% of the combined Hispanic and black population according to the 1990 Census, and furthermore included at least 70% of the black population according to the 1990 Census. |
| C | Stratum 5: | Certainty-high-concentration white area segments. These segments had 2% or fewer of the combined Hispanic and black population according to the 1990 Census. |

To complete the stratum definitions for the remainder of the national study, an initial global noncertainty stratum was created for the residual portion of the United States and defined as follows:

- The initial noncertainty stratum representing the balance of the Nation.

¹In the interest of readability for this report, "white" is used to indicate "white, non-Hispanic" and "black" to indicate "black, non-Hispanic."

Following the final two stages of within-segment dwelling unit person sampling, segments in the noncertainty stratum for the national study were partitioned into five substrata to improve the efficiency of the design by reducing the size of the screening sample.

Prior to the formation of the final strata, an optimal allocation procedure was used to allocate the sample to the five strata listed above. The results of the allocation suggested that total survey costs would be minimized for fixed precision when Hispanics were oversampled in the national study strata in which they were concentrated. Once sufficient screening interviews were conducted to identify the required number of Hispanic dwellings, more than enough black and white dwellings would be identified so that these interviews could be proportionally allocated to strata in the national study. For the Arizona/California supplement, there was no oversampling of Hispanics because each State's Hispanic allocation in the national study component was large enough to satisfy State-level precision requirements. Consequently, the three racial/ethnic groups were sampled in the supplement so that the combined national study and supplemental samples would result in a proportionally allocated sample.

The remaining 72 noncertainty PSUs for the national study were selected from Stratum 6. The noncertainty PSUs, single counties, were selected with probability proportional to a composite size measure. The composite size measure was defined as the sum of racial/ethnic group dwelling counts weighted by the specified racial/ethnic sampling rates. This selection scheme allowed for targeting particular racial/ethnic subpopulation sample sizes. Chromy's (1979) probability minimum replacement sequential sampling scheme was used to select these 72 PSUs with probabilities proportional to their composite size measures. The use of a composite size measure ensured (a) roughly equal sample sizes per sample subarea (the second-stage unit of selection) and (b) roughly equal probabilities of selecting eligible individuals (the fifth- or final-stage unit of selection) within race/ethnicity, and age group.

A State-supplementary sample large enough to provide reliable estimates for Arizona and California was selected to participate in quarters 1 through 4 of the 1998 NHSDA. The certainty PSUs included in the supplement also were included in the national study. This supplement consisted of no additional certainty PSUs because a representative certainty-PSU sample from both States was already participating in the national study.

The same first-stage sampling frame used for the noncertainty national sample also was the basis for selecting an independent supplement of four PSUs from Arizona and two PSUs from California. Because the noncertainty counties in Arizona were large geographically relative to population density, the counties representing the residual outside the certainty counties in Arizona were subdivided into smaller areas (Census tracts). Groups of these tracts satisfying a minimum population size requirement were defined as PSUs so that data collection would be more manageable. For the noncertainty California PSU sample, no subdivision of counties was necessary; hence, each noncertainty-county was a single PSU.

Selection of the Second-Stage Sample: Subareas within PSUs

The 1998 NHSDA used all available segments that had adequate listing units from the 1997 NHSDA. Only 24% of the 1998 sample, or 640 segments, consisted of a new segment sample selected for the 1998 NHSDA. The remaining 76%, or 2,030 segments, overlapped with the 1997 survey year. The overlap feature was used to help to reduce the sampling variance for trend estimates, as well as minimize field costs.

The 1998 second-stage sampling frame was based on the 1990 Decennial Census. Census blocks were combined with adjacent blocks based on the block identification number to create nonoverlapping area segments with at least 90 occupied dwelling units. The sample segment size allocations, based on optimal allocation and the expected precision requirements of individual strata, are given in Table 1 for each stratum (see p. i-18 at the end of this introduction). These allocations assumed that about nine interviews would be completed per sample segment.

The area segments from each stratum of each of the PSUs were selected with probabilities proportional to a size measure. For each stratum, a composite size measure was defined to equal a weighted sum of the numbers of all dwelling units with weights proportional to the desired racial/ethnic sampling rates. Segments within the national Strata 1 to 5 were sorted to implicitly stratify the sampling frame to reduce sampling variability and to control the distribution of the sample. A variable number of segments was selected from each PSU in Strata 1 to 5 based upon each PSU's composite size measure. To reduce screening cost, the subareas of the initial national noncertainty stratum were partitioned into three noncertainty substrata - high black, high white, and remainder-based on 1990 Census block data, and the selection of sample subareas was carried out separately within these three substrata. In the Arizona and California supplements, nine area segments were selected from each PSU with the probability proportional to their composite size measure.

Selection of the Third-Stage Sample: Listing Units within Subareas

Projections indicated that screenings had to be completed for approximately 73,000 dwelling units in order to identify sufficient dwelling units for the national and State samples to yield Hispanic and black age-domain samples of the desired size. Assuming an average 94% screening completion rate and a projected average 84.5% listing unit eligibility rate implied that approximately 92,000 listings had to be selected for both study components. A listing unit was ineligible for the study if it was (a) vacant; (b) a vacation, second, or temporary home; (c) not a dwelling unit; (d) a military facility whose occupants were only military personnel; or (e) an institutional housing facility.

Dwelling unit listings were selected using systematic sampling. The sampled listings then were sent to the field for screening. After first determining that a sampled listing was eligible for the study, the interviewer completed a dwelling roster that listed all residents aged 12 or older with their age and race/ethnicity. This roster formed the basis for the within-dwelling unit sampling of individuals.

Within-Dwelling Unit Sampling

The 1998 NHSDA used basically the same within-dwelling unit sample selection approach as the 1997 NHSDA. Following the third-stage sampling, interviewers screened each sampled dwelling unit. Based on the screening, the dwelling was classified according to the race/ethnicity of the head of the dwelling. The interviewers also determined the age domains represented by individuals residing in the dwelling in terms of presence or absence of individuals aged 12 to 17, 18 to 25, 26 to 34, 35 to 49, and 50 or older. Interviewers were provided a mechanism for selecting none, one, or two age domains and, subsequently, one sample person from each selected domain. The age domain selection probabilities were based on the desired sample sizes for each age group by racial/ethnic domain. If a dwelling unit contained two or more individuals in the same age domain, the probability of selecting a particular individual was based on the number of individuals in the age domain. In some instances, two individuals, usually one 12 to 17 year old and one adult, were selected from the same dwelling unit.

Data Collection and Response Rates

The fieldwork for the 1998 NHSDA was directed by senior staff members at Research Triangle Institute (RTI). A total of 25,500 completed interviews was obtained for the 1998 survey. A completed interview had to contain, at a minimum, data on the recency of use of marijuana, cocaine, and alcohol.

Strategies for ensuring high rates of participation resulted in an unweighted interview response rate of 77% for the 1998 survey. Of the 25,500 completed interviews, 12,890 were with whites and others (i.e., non-Hispanic, nonblacks), 5,815 were with non-Hispanic blacks, and 6,795 were with Hispanics. The response rates for these three racial/ethnic groups were 74.1% for whites and others, 79.7% for blacks, and 80.5% for Hispanics.

Throughout the course of the study, the respondent's anonymity and the privacy of his or her responses were protected by separating identifying information from survey responses. Respondents were assured that their identities and responses would be handled in the strictest compliance with Federal law. The questionnaire itself and the interviewing procedures were designed to enhance the privacy of responses, especially during segments of the interview in which questions of a sensitive nature were posed. Respondents were asked to mark answer sheets to record their responses to questions read aloud by the interviewer. The interviewer did not see the completed answer sheets.

Weighting Procedures

The estimates of this report are based on sample survey data rather than on complete data for the population. This means that the data must be weighted to obtain unbiased estimates for drug use in the population represented by the 1998 NHSDA. The 'final sampling weight' of the i th respondent, say w_i , can be interpreted as the number of persons in the NHSDA target population who are represented by the i th respondent. The sum of the weights over all respondents estimates the size of the total target population:

$$\sum_i w_i = \text{estimated size of target population,} \quad (1)$$

where the summation is over all NHSDA respondents in the 1998 NHSDA.

The "basic sampling weights" for the 1998 NHSDA are equal to the inverse of the probabilities of selection of sample respondents. In other words, the smaller a respondent's chance of entering the sample, the larger the weight of that respondent is in the calculation of unbiased estimates for the target population. The probability of selection of a respondent can be computed as the product of five stagewise sampling probabilities. The probability of selecting respondent i equals the product of (a) the probability of selecting respondent i 's PSU, (b) the probability of selecting respondent i 's subarea given the selection of i 's PSU, (c) the probability of selecting respondent i 's dwelling unit given selection of his or her subarea, (d) the probability of selecting age groups within dwelling units, and (e) the probability of selecting respondent i given the selection within sampled age group.

To obtain the "final NHSDA weights," the "basic sampling weights" were adjusted to take into account dwelling unit-level and individual-level nonresponse and further adjusted to ensure consistency with intercensal population projections obtained from the U.S. Bureau of the Census. The weight adjustments in the 1998 NHSDA were similar to the weight adjustments that were applied in previous NHSDAs.

Contents and Organization of the 1998 NHSDA Public Use File

Data File Description

The file described here has been recorded on a compact disc as a SAS dataset in PC-format. The dataset has these characteristics:

Internal SAS name	PUF98
SAS version	6.12
Number of observations	25,500
Number of variables	1,404

The overall organization of the file is shown in the Table of Contents of this document. Edited data from the questionnaire and drug answer sheets make up the first portion of the file. These variables contain missing data; see the section on "Standard Code Conventions" below for a description of the codes given to

different types of missing data. The number of observations for which data are missing for any given variable is shown in the entry for that variable.

Imputation-revised demographic and drug use variables and recoded versions of these variables are given in the next four sections of the file. These variables include indicators for lifetime, past year, and past month substance use, as well as imputation-revised demographic variables, such as age, race/ethnicity, education, employment, and income. Missing values for these variables have been imputed using the statistical imputation procedures described below. Imputation indicators are provided for each variable so that users may easily determine whether an observation contains data from the questionnaire or an imputed value. Users who wish to replicate results published in the *National Household Survey on Drug Abuse: Main Findings 1998* (OAS, 2000) or other SAMHSA reports should use the 1998 NHSDA imputed data for prevalence estimates rather than raw data from the questionnaire or drug answer sheets.

Many of the remaining variables in the 1998 file are recoded or logically imputed variables created for the prevalence section of the 1998 NHSDA questionnaire. These variables include recodes of questionnaire and imputation revised drug variables, and logically imputed variables and recoded versions of logically imputed variables pertaining to drug use problems, symptoms of dependency, and negative drinking experiences.

For recoded variables the missing codes contained in the source variables and defined in the “Standard Code Convention” section of this codebook are often recoded to the standard SAS missing code (.) to facilitate use within software packages, such as SURvey DATA ANalysis (SUDAAN). It is intended that cases containing these SAS missing codes be excluded from an analysis.

Variables containing the original responses to recency-of-use questions are presented in a section called “Selected Unedited Variables.” These are included to show that the recency data collected before the responses were edited are based on evidence of use found elsewhere in the questionnaire.

Variable Naming Conventions

Variable names are mnemonics related to the meaning of each variable. The user is advised that the new-version answer sheets used to collect the data documented in this codebook are different from those used in NHSDAs prior to 1994. Insofar as possible, variables identical to those in the 1985, 1988, 1990, 1991, 1992, 1993, 1994-A, 1994-B, 1995, 1996, and 1997 NHSDA Public Release files have also been named identically. However, the user should refer to the questionnaires and previous codebooks to verify that the data are exactly comparable.

Imputations

For selected key variables, response data were changed to reflect more recent use or missing data were replaced with nonmissing values. The two different imputation procedures used are distinguished in this codebook by the code-value descriptive phrases “...LOGICALLY IMPUTED” and “..imputed” or by the designation “IMPUTATION-REVISED” in the variable label.

Logical imputation was carried out in the earliest stage of editing for the original recency-of-use variables. For each recency-of-use variable, this procedure involved checking other variables only within the same answer sheet that could yield evidence of use (or more recent use) of that specific drug or class of drugs. Then the most recent indication supplied by the respondent of use of that drug replaced missing data in the subject drug recency-of-use variable, or it was used to change a less recent response value to a value reflecting the indication elsewhere of more recent use. Unique code values (7, 8, or 9) were assigned to the recency-of-use variable when such logical imputation occurred; these code values are readily identifiable by the phrase “... LOGICALLY ASSIGNED” in the code-value descriptions. For those recency-of-use variables with missing data for which no indication of use of the drug could be found after examination of all relevant variables on the

same answer sheet, a code value of 81 (Never used, logically assigned) was assigned if there were one or more indications in the answer sheet set of variables that the respondent had never used the drug. The variables for which logical imputation was implemented are CIGREC, SNUFREC, ALCREC, MJREC, COCREC, CRAKREC, HERREC, HALLREC, PCPREC, LSDREC, INHREC, ANALREC, TRANREC, STIMREC, SEDREC, and NEEDLREC.

At this point in the editing process, a determination was made as to whether each record in the database contained enough information to be considered complete. To be classified as a minimally complete case, and thus retained in the database, data on the recency of use of alcohol, marijuana, and cocaine had to have been provided by the respondent or logically imputed from other answers supplied by the respondent.

For selected variables of interest, statistical imputation was done following logical imputation in order to replace missing responses with statistically imputed responses. Most of the recency-of-use variables (except for alcohol, marijuana, and cocaine recency-of-use variables), frequency-of-use variables, cigar use, age, race, gender, Hispanic-origin variables, marital status, work status, education, high school graduate indicator, and total and private health insurance were imputed by using the technique of sequential hot-deck imputation (using various sorts and classing variables). The personal and family income variables, as well as the past 12 month alcohol, marijuana, and cocaine frequency-of-use variables, were imputed using regression-based methods. Variables in this database for which the imputation procedures were implemented may be identified by the designation “IMPUTATION-REVISED” in the variable label, and their variable names begin with the letters IR. In addition, for each imputation-revised variable, there is an “IMPUTATION INDICATOR” variable whose values distinguish whether the imputed variable’s value originated from interview responses or was imputed.

Results published in the 1998 NHSDA Population Estimates report and the 1998 NHSDA Main Findings report were generated using variables (or their derivatives) that were derived by means of logical imputation and/or the hot-deck or regression-based imputation methods described above. Some of the resultant recode variables used in the 1998 NHSDA Main Findings report are documented at the end of this codebook.

In general, analysts are advised to use the imputation-revised variables for tabular summaries and other descriptive analyses. For analyses of relationships where multiple data items are involved, use of these imputation-revised variables may not be appropriate. Usually, these analyses span data items that were not jointly used in defining the imputation procedure (either as the output variable or as a classing or sorting variable). In this situation, use of nonimputed data items may be best.

Standard Code Conventions

Generally, the following codes have the same (or consistent) meanings across all variables (exceptions are noted in the documentation for individual variables).

91 or 991 or 9991, etc. = Never used the substance

92 or 992 or 9992, etc. = Response illegible

93 or 993 or 9993, etc. = Did not use drug under conditions in the question (e.g., during time period)

94 or 994 or 9994, etc. = Don’t know

95 or 995 or 9995, etc. = Bad data (usually, inconsistent with other data)

96 or 996 or 9996, etc. = Multiple response

97 or 997 or 9997, etc. = Refusal

98 or 998 or 9998, etc. = Blank (not answered)

99 or 999 or 9999, etc. = Legitimate skip

Most logically edited changes resulted in the assignment of the following codes whose meanings are equivalent to the standard codes above:

81 or 981 or 9981, etc. = Never used the substance LOGICALLY ASSIGNED

83 or 983 or 9983, etc. = Did not use drug under conditions in the question (e.g., during time period) LOGICALLY ASSIGNED

85 or 985 or 9985, etc. = Bad data (usually, inconsistent with other data) LOGICALLY ASSIGNED

89 or 989 or 9989, etc. = Legitimate skip LOGICALLY ASSIGNED.

Variables from answer sheets #13 to #20 (i.e., the SPECIAL DRUGS, RISK/AVAILABILITY, DRUGS, SPECIAL TOPICS, TREATMENT, DRUG EXPERIENCES, YOUTH EXPERIENCES, and SOCIAL ENVIRONMENT answer sheets)² were not edited to be made consistent with any drug recency-of-use variables. Editing was conducted, however, to ensure consistency within each of these answer sheets' own set of variables. It should be noted that, as a result of not editing across answer sheets (as has been done for NHSDAs since 1988), drug use variables from the above listed answer sheets may be inconsistent with the edited recency-of-use variables. In this codebook, variables from these nine “non-core” answer sheets are denoted with an asterisk (*) at the beginning of the variable label to indicate that values on these answer sheets may be inconsistent with data from the first 12 answer sheets, which are referred to as the “core” answer sheets.

Variance Estimation and Design Effects

Statistical Significance of Differences

This section describes the methods that were used to compare prevalence estimates. Customarily, the observed difference between estimates is evaluated in terms of its statistical significance. “Statistical significance” refers to the probability that a difference as large as that observed would occur due to random error in the estimates if there were no difference in the prevalence rates for the population groups being compared. In Chapters 2 and 11 of the Main Findings 1998 report (OAS, 2000), comparisons were made between estimates in the 1997 NHSDA survey and the 1998 survey and in other chapters between estimates within the 1998 survey. The significance of observed differences is reported at the 0.05 and 0.01 levels. However, the reader may wish to compare prevalence estimates from two groups for which the significance of the difference is not reported.

To compare the prevalence of drug use for 1997 versus 1998, one can test the hypothesis of no difference in prevalence rates using the standard difference in proportions test, expressed as

²These are designated as “non-core” answer sheets because their content or inclusion in the interview can change from year to year.

$$Z = \frac{p1 - p2}{\sqrt{\text{var}(p1) + \text{var}(p2) - 2\text{cov}(p1, p2)}},$$

where

$p1$ = 1997 estimated proportion,

$\text{var}(p1)$ = variance estimate for $p1$,

$p2$ = 1998 estimated proportion,

$\text{var}(p2)$ = variance estimate for $p2$, and

$\text{cov}(p1, p2)$ = covariance between $p1$ and $p2$.

Under the null hypothesis of no difference in prevalence rates, Z is asymptotically distributed as a normal random variable; calculated values of Z can, therefore, be referred to the unit normal distribution to determine the corresponding probability level (i.e., p value). Because the 1997 and 1998 NHSDAs used a high percentage (76%) of overlapping sample segments, the covariance term in the formula for Z is greater than zero in comparisons of the 1997 and 1998 surveys.

For comparing prevalence estimates within the same survey, the same Z statistic quoted above can be used. The covariance term in the formula for Z is again greater than zero because of the small positive covariance expected between any two nonindependent prevalence estimates.

Sample Design Effects and Generalized Standard Errors

This section describes methods for approximating sampling variability by computing generalized standard errors. (The standard error estimate is the square root of the variance estimate.)

The best variance estimation approach is to use commercially available variance estimation software packages, such as RTI's Survey Data Analysis or SUDAAN package (Shah, Barnwell, & Bieler, 1997). Most software packages compute variance estimates for means, percentages, and other statistics based on first-order Taylor series approximation of the deviations of estimates from their expected values.

For use with software such as SUDAAN, two variables were created: VESTR and VEREP. The sampling design used to select the NHSDA results in a deeply stratified sample. Therefore, adjacent strata are collapsed into pairs to create pseudo-strata (VESTR) with two replicates each (VEREP). For all non-certainty strata, the PSUs (each of which represents an implicit stratum) are grouped into pairs based on their sequential order of selection. Each pair of PSUs defines a pseudo-stratum (VESTR) with two replicates (VEREP). For the certainty portion of the sample, segments represent the first stage of sampling. Each explicit design stratum is partitioned into groups of approximately 24 segments based on order of selection (e.g., about the size of a non-certainty pseudo-stratum). These sets of approximately 24 segments define pseudo-strata (VESTR) for analysis purposes. The segments are then paired in selection order within each certainty pseudo-stratum. One segment from each pair is randomly assigned to replicate 1 and the other segment to replicate 2 (VEREP).

Standard errors have been computed using SUDAAN for all parameter estimates appearing in the 1998 Main Findings report and are available from OAS upon request. Given below is an example using SUDAAN

to calculate the estimated number and percentage of lifetime marijuana users by sex (i.e., gender) and race/ethnicity within age group. The input data file must be sorted by VESTR and VEREP.

```
PROC DESCRIPT DATA = "D:\PUF98" FILETYPE=SAS DESIGN=WR;
NEST VESTR VEREP;
WEIGHT ANALWT;
VAR MRJFLAG;
SUBGROUP CATAGE SEX RACE;
LEVELS 4 2 4;
TABLES CATAGE*(SEX RACE);
SETENV DECWIDTH=6 COLWIDTH=17;
PRINT NSUM WSUM MEAN SEMEAN SETOTAL/
      NSUMFMT=F8.0 WSUMFMT=F12.0 MEANFMT=F15.10
      SEMEANFMT=F15.10 SETOTALFMT=12.0
OUTPUT NSUM WSUM MEAN SEMEAN SETOTAL/
      NSUMFMT=F8.0 WSUMFMT=F12.0 MEANFMT=F15.10
      SEMEANFMT=F15.10 SETOTALFMT=F12.0;
```

Whenever possible, estimates generated by a software package such as SUDAAN should be used to compute confidence intervals and perform statistical comparisons. However, it is the goal here to provide future users of the 1998 NHSDA database with approximate standard error estimates for situations in which such computation of NHSDA standard error estimates is not possible.

Two approaches for approximating standard error estimates are presented in this section. The first uses median domain design effects. The second is based on a prediction equation obtained from modeling design effects. These alternatives to the published standard error estimates are described below.

Median Design Effects

The design effect is the ratio of the design-based variance estimate divided by the variance estimate that would have been obtained from a simple random sample of the same size. Therefore, the design effect summarizes the effects of stratification, clustering, and unequal weighting on the variance of a complex sample design. Because clustering and unequal weighting are expected to increase the variance, the design effect should virtually always be greater than one.

Design effects, however, were frequently less than one for prevalence rates near zero. Because these values were considered spurious, another design effect estimate based only on stratification and unequal weighting effects was substituted if it was greater than the total design effect. Moreover, if both design effect estimates were less than one, a value of one was substituted.

For the 1998 NHSDA, the median design effects were based on estimates from the following:

- **15 illicit drug use categories:** any illicit drug use; marijuana/hashish; cocaine; crack; inhalants; hallucinogens; lysergic acid diethylamide (LSD), phencyclidine (PCP); heroin; nonmedical use of any psychotherapeutic; nonmedical use of stimulants; nonmedical use of sedatives; nonmedical use of tranquilizers; nonmedical use of analgesics; any illicit drug except marijuana; and
- **3 licit drug use categories:** cigarettes; alcohol; and smokeless tobacco;
- for each of **3 recency-of-use categories:** lifetime use; past year use; past month use.

The estimates of past month heavy drinking and binge drinking also were included in the licit drug use category, bringing the total number of estimates used for median calculation to 56.

For each specified domain within the 1998 NHSDA, a median design effect was calculated from the above estimates as opposed to calculating an average design effect. Because extreme values of some design effects would have distorted the associated averages, medians were chosen to provide a better measure of the central value. The domains were defined by cross-classifications of age and race/ethnicity by gender, race/ethnicity, population density, geographic region of residence, adult education, and current employment. Domains for Arizona and California also were included. Design effects associated with percentage estimates exhibiting low precision were not used. Because the design effects from the licit drug use estimates tended to be larger than the design effects from the illicit drug use estimates, the median design effects were computed separately for these two classifications.

Table 2 presents the median design effects for the illicit drugs, and Table 3 presents the median design effects for the licit drugs. These tables can be used to calculate an approximate variance estimate for a particular domain of 1998 NHSDA as follows:

$$var(p_d)_{appx} = DEFF_{d,MED} [p_d(1-p_d)/n_d] , \quad (2)$$

where

p_d = estimated proportion for domain d ,

n_d = sample size for domain d , and

$DEFF_{d,MED}$ = median design effect for domain d .

The approximate standard error estimate for p_d , $SE(p_d)_{appx}$, is simply the square root of $var(p_d)_{appx}$.

Model-Based Prediction

When a median design effect for a domain under investigation is not listed in Tables 2 or 3, an alternative standard error approximation is recommended. This approximation uses a prediction equation obtained from modeling estimated design effects. The definition of the design effect is the basis for the regression model:

$$DEFF(p) = var(p) / [p(1-p)/n] ,$$

where

$var(p)$ = design-based variance estimate of p , and

$[p(1-p)/n]$ = simple random sample variance estimate of p .

Taking the log (base 10) of both sides of the above equation leads to the following log-linear model:

$$\log[DEFF(p)] = \beta_0 + \beta_1 \log(p) + \beta_2 \log(1-p) + \beta_3 \log(n) ,$$

where

$\beta_0, \beta_1, \beta_2, \beta_3$ = regression coefficients for the intercept, $\log(p)$, $\log(1-p)$ and $\log(n)$, respectively.

Separate models were fit for the licit and illicit drug use estimates in the 1998 NHSDA. The design effects used to calculate the medians in Tables 2 and 3 were used to fit the licit and illicit drug use models for the 1998 NHSDA. Estimated proportions less than 0.5 were converted to $1-p$ for the models.

By substituting the fitted model into the definition of the design effect, a prediction equation for the approximate standard error is obtained:

$$SE_i(p)_{appx} = \frac{10^{(b_{0i}/2)} (p^{(1\%b_{1i})/2} ((1\&p)^{(1\%b_{2i})/2}))}{n^{(1\&b_{3i})/2}},$$

where

b_{0i} , b_{1i} , b_{2i} , b_{3i} = regression coefficients estimates for the intercept, $\log(p)$, $\log(1-p)$, and $\log(n)$, respectively.

The index- i indicates whether the standard error approximation is for a licit drug or illicit drug prevalence estimate.

After solving for the regression coefficients, the above approximation reduces to the following two prediction equations:

$$SE(p_{illicit})_{appx} = \frac{1.1869 (p^{(0.7640)} ((1\&p)^{(0.5916)}))}{n^{(0.4259)}}. \quad (3)$$

$$SE(p_{licit})_{appx} = \frac{0.8817 (p^{(0.5043)} ((1\&p)^{(0.5393)}))}{n^{(0.4068)}}. \quad (4)$$

Tables 4 and 5 present generalized standard errors for various percentages (from 1% to 99%) and sample sizes (from 100 to 25,500) for the 1998 NHSDA, predicted from Equations (3) and (4).

In summary, the user may obtain 1998 NHSDA standard error estimates from the following recommended order of sources:

1. commercially available variance estimation software packages, such as SUDAAN; otherwise,
2. published standard errors from reports using data from the 1998 NHSDA (obtainable upon request from the OAS at SAMHSA); otherwise,
3. median domain design effects appearing in Tables 2 and 3 and application of Equation (2); otherwise,

4. model-based prediction, using Equations (3) and (4) or Tables 4 and 5, for national or regional estimates.

Once the variance estimates have been obtained, the user may apply the methods discussed in previous sections to compute confidence intervals or make statistical comparisons.

Use of Sample Weights and Sample Design Variables

Due to the coverage bias, the NHSDA sample is not self-weighting. Analysts are advised to use the sample weight when attempting to use the NHSDA data to draw inferences about the target population or any subdomain of the target population. All estimates published in SAMHSA reports (such as 1998 Main Findings) are weighted. The appropriate and final sample weight is called ANALWT on this data file. This sample weight represents the total number of target population persons each record on the file represents. Note that the sum of ANALWT, over all records on the data file, represents an estimate of the total number of people in the target population. Additional information on the sample weighting procedures and the sample weight components may be found in the *1998 Methodological Resource Book*, available from OAS.

The public use file contains two sample design variables in addition to ANALWT. These variables are VESTR (sample stratum) and VEREP (replicate within stratum) and must be used to estimate variances and standard errors when using commercially available variance estimation software packages, such as SUDAAN or any other.

Confidentiality of Data

To protect the confidentiality of NHSDA respondents, all variables that could be used to identify individual respondents have been deleted from the public use file. To further protect confidentiality, some continuous variables have been categorized, and some categorical variables have been top-coded and/or bottom coded. These data modifications should not greatly affect most analytical uses of the 1998 NHSDA public use file.

HEALTH

Now we have some questions concerning
your health.

HE-1. About how tall are you, without
shoes?

HEIGHT2	3	HEIGHT IN INCHES (WITHOUT SHOES)		
		RANGE = 56 - 74	24574	96.37
		55 = 55 or under.....	189	0.74
		75 = 75 or over.....	562	2.20
		985 = BAD DATA Logically assigned.....	2	0.01
		994 = DON'T KNOW.....	108	0.42
		995 = BAD DATA.....	2	0.01
		997 = REFUSED.....	10	0.04
		998 = BLANK (NO ANSWER).....	53	0.21

HE-2. About how much do you weigh,
without shoes?

NOTE: The range of 78 - 298 represents the
midpoints of 5-pound intervals between 78
and 298, inclusive.

POUNDS2	3	WEIGHT IN POUNDS WITHOUT SHOES		
		RANGE = 78 - 298	24955	97.86
		75 = 75 or under.....	99	0.39
		301 = Over 300.....	102	0.40
		985 = BAD DATA Logically assigned.....	11	0.04
		994 = DON'T KNOW.....	142	0.56
		995 = BAD DATA.....	3	0.01
		997 = REFUSED.....	107	0.42
		998 = BLANK (NO ANSWER).....	81	0.32

HE-3. Would you say your health in
general is...(READ ANSWER CHOICES)

HEALTH	2	HEALTH IN GENERAL		
		1 = Excellent.....	8692	34.09
		2 = Very good.....	8467	33.20

-----	---	-----	----	-
		TOBACCO -- ANSWER SHEET #1		

		The first 10 questions are about cigarettes only.		
		C-1. Have you ever smoked a cigarette, even one or two puffs?		
CIGEVER	2	EVER SMOKED A CIGARETTE		
		1 = Yes.....	14890	58.39
		2 = No.....	10393	40.76
		3 = Yes LOGICALLY ASSIGNED.....	98	0.38
		4 = No LOGICALLY ASSIGNED.....	113	0.44
		98 = BLANK (NO ANSWER).....	6	0.02
		C-2. How old were you the first time you smoked a cigarette, even one or two puffs?		
CIGTRY	3	AGE WHEN FIRST SMOKED A CIGARETTE		
		RANGE = 2 - 65	14881	58.36
		981 = NEVER USED CIGARETTES Logically assigned.....	317	1.24
		985 = BAD DATA Logically assigned.....	29	0.11
		991 = NEVER USED CIGARETTES.....	10189	39.96
		994 = DON'T KNOW.....	15	0.06
		995 = BAD DATA.....	3	0.01
		998 = BLANK (NO ANSWER).....	66	0.26
		C-3. Think about the entire time since you first smoked a cigarette. Altogether, on how many days in your life have you smoked a cigarette?		
CIGTOT	2	# DAYS SMOKED CIGARETTES IN LIFE		
		1 = More than 300 days.....	6860	26.90
		2 = At least 101 but not more than 300 days.....	1257	4.93
		3 = At least 12 but not more than 100 days.....	1855	7.27
		4 = At least 3 but not more than 11 days.....	1703	6.68
		5 = At least 1 but not more than 2 days.....	3162	12.40
		81 = NEVER USED CIGARETTES Logically assigned.....	106	0.42
		85 = BAD DATA Logically assigned.....	130	0.51
		91 = NEVER USED CIGARETTES.....	10400	40.78
		94 = DON'T KNOW.....	1	0.00
		97 = REFUSED.....	1	0.00
		98 = BLANK (NO ANSWER).....	25	0.10

		TOBACCO	PAGE: 8	
LABEL	LEN	DESCRIPTION	FREQ	%
-----	---	-----	----	-
		C-4. How long has it been since you last smoked a cigarette?		
CIGREC	2	TIME SINCE LAST SMOKED A CIGARETTE		
		1 = Within the past 30 days.....	5984	23.47
		2 = More than 30 days ago but within the past 12 mos..	1051	4.12
		3 = More than 12 months ago but within the past 3 yrs.	1296	5.08
		4 = More than 3 years ago.....	5348	20.97
		7 = Use in past 30 days LOGICALLY ASSIGNED.....	1137	4.46
		9 = Use in lifetime LOGICALLY ASSIGNED.....	172	0.67
		81 = NEVER USED CIGARETTES Logically assigned.....	121	0.47
		91 = NEVER USED CIGARETTES.....	10385	40.73
		98 = BLANK (NO ANSWER).....	6	0.02
		THE NEXT THREE QUESTIONS REFER TO THE PAST 30 DAYS ONLY.		
		C-5. Think specifically about the past 30 days--that is, from your 30-day reference date up to and including today. During the past 30 days, on how many days did you smoke a cigarette?		
CIG30USE	2	# DAYS SMOKED PAST 30 DAYS		
		RANGE = 1 - 30	6105	23.94
		35 = Date specified within the past 30 days.....	3	0.01
		81 = NEVER USED CIGARETTES Logically assigned.....	133	0.52
		83 = DID NOT USE CIGARETTES IN PAST 30 DAYS Log assn...	952	3.73
		85 = BAD DATA Logically assigned.....	836	3.28
		91 = NEVER USED CIGARETTES.....	10373	40.68
		93 = DID NOT USE CIGARETTES IN THE PAST 30 DAYS.....	6915	27.12
		94 = DON'T KNOW.....	1	0.00
		95 = BAD DATA.....	57	0.22
		98 = BLANK (NO ANSWER).....	125	0.49

TOBACCO			PAGE: 9	
LABEL	LEN	DESCRIPTION	FREQ	%
-----	---	-----	----	-
		C-6. When you smoked cigarettes during the past 30 days, how many did you usually smoke each day? If the number varied from day to day, mark the box for the number of cigarettes you smoked on a typical day.		
AVCIG	2	# CIGARETTES SMOKED PER DAY PAST 30 DAYS		
		1 = At least a puff but less than one cig each day....	1244	4.88
		2 = 1 to 5 cigarettes each day.....	2013	7.89
		3 = 6 to 15 cigarettes (about 1/2 pack) each day.....	1656	6.49
		4 = 16 to 25 cigarettes (about 1 pack) each day.....	1309	5.13
		5 = 26 to 35 cigarettes (about 1 1/2 pk) each day.....	352	1.38
		6 = 35 or more cigarettes (about 2 packs) each day....	195	0.76
		81 = NEVER USED CIGARETTES Logically assigned.....	95	0.37
		83 = DID NOT USE CIGARETTES PAST 30 DAYS Log assn.....	462	1.81
		85 = BAD DATA Logically assigned.....	330	1.29
		91 = NEVER USED CIGARETTES.....	10411	40.83
		93 = DID NOT USE CIGARETTES IN THE PAST 30 DAYS.....	7405	29.04
		94 = DON'T KNOW.....	1	0.00
		95 = BAD DATA.....	1	0.00
		98 = BLANK (NO ANSWER).....	26	0.10
		C-7. When you smoked cigarettes during the past 30 days, how soon after you woke up in the morning did you usually smoke your first cigarette?		
CIG30WOK	2	TIME BEFORE SMOKING FIRST CIGARETTE AFTER WAKING		
		1 = 5 minutes or less.....	1074	4.21
		2 = 6 to 30 minutes.....	1668	6.54
		3 = 31 to 60 minutes.....	846	3.32
		4 = 1 to 3 hours.....	997	3.91
		5 = 4 or more hours.....	1796	7.04
		81 = NEVER USED CIGARETTES Logically assigned.....	101	0.40
		83 = DID NOT USE CIGARETTES IN PAST 30 DAYS Log assn...	454	1.78
		85 = BAD DATA Logically assigned.....	690	2.71
		91 = NEVER USED CIGARETTES.....	10405	40.80
		93 = DID NOT USE CIGARETTES IN THE PAST 30 DAYS.....	7413	29.07
		94 = DON'T KNOW.....	1	0.00
		95 = BAD DATA.....	1	0.00
		98 = BLANK (NO ANSWER).....	54	0.21

		TOBACCO	PAGE:	10
LABEL	LEN	DESCRIPTION	FREQ	%
-----	----	-----	----	-
		THE REST OF THE QUESTIONS ON THIS ANSWER SHEET ASK ABOUT YOUR ENTIRE LIFETIME.		
		C-8. Has there ever been a period in your life when you smoked cigarettes everyday?		
CIGEVYDA	2	EVER SMOKED DAILY		
		1 = Yes.....	7318	28.70
		2 = No.....	17040	66.82
		3 = Yes LOGICALLY ASSIGNED.....	632	2.48
		4 = No LOGICALLY ASSIGNED.....	455	1.78
		97 = REFUSED.....	1	0.00
		98 = BLANK (NO ANSWER).....	54	0.21
		C-9. How old were you when you first started smoking cigarettes everyday?		
CIGAGE	3	AGE WHEN FIRST STARTED SMOKING CIGARETTES EVERYDAY		
		RANGE = 2 - 74	7587	29.75
		981 = NEVER USED CIGARETTES Logically assigned.....	141	0.55
		983 = NEVER USED CIGARETTES EVERYDAY Log assn.....	340	1.33
		985 = BAD DATA Logically assigned.....	311	1.22
		991 = NEVER USED CIGARETTES.....	10365	40.65
		993 = NEVER USED CIGARETTES EVERYDAY.....	6573	25.78
		994 = DON'T KNOW.....	8	0.03
		995 = BAD DATA.....	2	0.01
		997 = REFUSED.....	1	0.00
		998 = BLANK (NO ANSWER).....	172	0.67
		C-10. For how many years have you smoked or did you smoke cigarettes everyday?		
CIGYRS	3	# YEARS SMOKED CIGARETTES EVERYDAY		
		RANGE = 1 - 70	6671	26.16
		0 = I smoked cigs every day but only for < one year...	894	3.51
		981 = NEVER USED CIGARETTES Logically assigned.....	111	0.44

NOTE: New levels were added to the variable YEENRLYR in 1998 to indicate whether YEENRLYR was edited based on data within the skip pattern associated with YEENRLYR, or whether YEENRLYR was edited based on data from outside the skip pattern that indicated school enrollment in the past 12 months. If YEENRLYR had not been assigned a value of 1 or 3 (see below), values of 5 in YEENRLYR indicate that the respondent reported both involvement in school-related extracurricular activities and receipt of drug education in school in the past 12 months. If YEENRLYR had not been assigned a value of 1, 3, or 5 (see below), values of 7 in YEENRLYR indicate that the respondent reported some involvement in school-related extracurricular activities or receipt of drug education in school in the past 12 months.

Now we have some questions about any medical treatment you may have had in a hospital emergency room. For these four questions, think about the past 12 months--that is, from your 12-month reference date up to and including today.

HC-1. During the past 12 months, how many different times have you been treated in an emergency room because of injury or illness?

NUERTMT2	2	# OF TIMES BEEN TREATED IN EMER. ROOM PAST 12 MO		
		0 = None.....	20577	80.69
		1 = Once.....	3253	12.76
		2 = Twice.....	873	3.42
		3 = 3 times.....	332	1.30
		4 = 4 or more times.....	349	1.37
		94 = DON'T KNOW.....	5	0.02
		96 = MULTIPLE RESPONSE.....	1	0.00
		97 = REFUSED.....	6	0.02
		98 = BLANK (NO ANSWER).....	104	0.41

HC-2. During the past 12 months, how many different times have you stayed overnight or longer in a hospital?

NUHSPOV2	2	# NIGHTS STAYED IN HOSPITAL OVERNIGHT OR LONGER		
		0 = None.....	23087	90.54
		1 = One night.....	1373	5.38
		2 = 2 nights.....	351	1.38
		3 = 3 or more nights.....	435	1.71
		94 = DON'T KNOW.....	4	0.02
		95 = BAD DATA.....	2	0.01
		97 = REFUSED.....	5	0.02
		98 = BLANK (NO ANSWER).....	243	0.95

-----	----	-----	----	-
		NON-CORE PROXY INFORMATION		

The next questions are about your health care, health insurance coverage, and the kinds and amounts of income that you receive. The answers to these questions will add greatly to our knowledge about the health problems of the American people, the types of health care they receive, and whether they can afford the care that they need. This information will help in planning health care services and finding ways to lower costs of care.

(IF RESPONDENT HAS NO FAMILY MEMBERS LIVING IN THIS RESIDENCE, SKIP TO ACCESS TO CARE SECTION ON PAGE 110.)

P-1. Is there some other family member who lives here that you think would be better able to give me the correct information about your health care, health insurance coverage, and the kinds of income you receive?

		NON-CORE HEALTH INSURANCE		

		The next questions are about your health insurance coverage and the kinds and amounts of income that you receive. The answers to these questions will add greatly to our knowledge about the health problems of the American people, the types of health care they receive, and whether they can afford the kind of care that they need. This information will help in planning health care services and finding ways to lower costs of care.		
		HI-1. Several government programs provide medical care or help pay medical bills. (HAND RESPONDENT SHOWCARD 10.) People covered by Medicare have a card that looks like this. (PAUSE) (Are you/Is SAMPLE MEMBER) covered by Medicare? Medicare is a health insurance program for persons 65 and older and for certain disabled persons.		
MEDICARE	2	COVERED BY MEDICARE		
		1 = Yes.....	1778	6.97

		<p>To be considered dependent on illicit drugs in the past 12 months, SUMDEP, a respondent must have indicated illicit drug use on both the core (SUMYR=1) and non-core (USEDSUM=1,3) answer sheets. They must further be dependent on at least one illicit drug (marijuana, cocaine, heroin, hallucinogens, inhalants, stimulants, tranquilizers, sedatives, or analgesics). The same procedure that is used to define marijuana dependence, MRJDEP, is used to define dependence for the other illicit drugs.</p>

NON-CORE RECODED TREATMENT VARIABLES				

The following variable, ALCTRT, was created by examination of the alcohol treatment variables: TXADGREC, TXLTALC, TXLTA. To have received alcohol treatment in the past year, a respondent must have said they received alcohol treatment in past 12 months (TXADGREC=1,2,8), been a core past year alcohol user (ALCYR=1), and either received treatment last for alcohol (TXLTALC=1,3) or listed in other specify that received last treatment for alcohol (TXLTA=807).

APPENDIX B

Occupational Classification System

Equivalent numeric codes follow the alphabetic code. Either code may be used, depending on the processing method. Numbers in parentheses following the occupation categories are the 1990 Standard Occupational Classification code equivalents. The abbreviation "pt" means "part" and "n.e.c." means "not elsewhere classified."

Occupation Code	Occupation Category	Code	Occupation Category
	MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS		Purchasing agents and buyers, n.e.c. (1449) Business and promotion agents (145) Construction inspectors (1472) Inspectors and compliance officers, exc. construction (1473) Management related occupations, n.e.c. (149)
1	<u>Executive, Administrative, and Managerial Occupations</u> Legislators (111) Chief executives and general administrators, public administration Administrators and officials, public administration (1132-1139) Administrators, protective services (1131) Financial managers (122) Personnel and labor relations managers (123) Purchasing managers (124) Managers; marketing, advertising, and public relations (125) Administrators, education and related fields (128) Managers, medicine and health (131) Post masters and mail superintendents (1344) Managers, food serving and lodging establishments (1351) Managers, properties and real estate (1353) Funeral directors (pt 1359) Management related occupations Managers, service organizations, n.e.c. (127, 1352, 1354, pt 1359) Managers and administrators, n.e.c. (121, 126, 132-1343, 136-139) Accountants and auditors (1412) Underwriters (1414) Other financial officers (1415, 1419) Management analysts (142) Personnel, training, and labor relations specialists (143) Purchasing agents and buyers, farm products (1443) Buyers, wholesale and retail trade, except farm products (1442)	2	<u>Professional Specialty Occupations</u> Architects (161) Engineers, surveyors and mapping scientists Aerospace engineers (1622) Metallurgical and materials engineers (1623) Mining engineers (1624) Petroleum engineers (1625) Chemical engineers (1626) Nuclear engineers (1627) Civil engineers (1628) Agricultural engineers (1632) Electrical and electronic engineers (1633, 1636) Industrial engineers (1634) Mechanical engineers (1635) Marine engineers and naval architects (1637) Engineers, n.e.c. (1639) Surveyors and mapping scientists (164) Mathematical and computer scientists Computer systems analysts and scientists (171) Operations and systems researchers and analysts (172) Actuaries (1732) Statisticians (1733) Mathematical scientists, n.e.c. (1739)

Natural Scientists

Physicists and astronomers (182,1843)
Chemists, except biochemists (1845)
Atmospheric and space scientists (1846)
Geologists and geodesists (1847)
Physical scientists, n.e.c. (1849)
Agricultural and food scientists (1853)
Biological and life scientist (1854, 1854)
Forestry and conservation scientists (1852)
Medical scientists (1855)

Health diagnosing occupations

Physicians (261)
Dentists (262)
Veterinarians (27)
Optometrists (281)
Podiatrists (283)
Health diagnosing practitioners, n.e.c. (289)

Health assessment and treating occupations

Registered nurses (29)
Pharmacists (301)
Dietitians (302)

Therapists

Respiratory therapists (3031)
Occupational therapists (3032)
Physical therapists (3033)
Speech therapists (3034)
Therapists, n.e.c. (3039)
Physicians' assistants (304)

Teachers, postsecondary

Earth, environmental, and marine science teachers (2212)
Biological science teachers (2213)
Chemistry teachers (2214)
Physics teachers (2215)
Natural science teachers, n.e.c. (2216)
Psychology teachers (2217)
Economics teachers (2218)
History teachers (2222)
Political science teachers (2223)
Sociology teachers (2224)

Social science teachers, n.e.c. (2225)
Engineering teachers (2226)
Mathematical science teachers (2227)
Computer science teachers (2228)
Medical science teachers (2231)
Health specialties teachers (2232)
Business, commerce, and marketing teachers (2233)
Agriculture and forestry teachers (2234)
Art, drama, and music teachers (2235)
Physical education teachers (2236)
Education teachers (2237)
English teachers (2238)
Foreign language teachers (2242)
Law teachers (2243)
Social work teachers (2244)
Theology teachers (2245)
Trade and industrial teachers (2246)
Home economics teachers (2247)
Teachers, postsecondary, n.e.c. (2249)
Postsecondary teachers, subject not specified

Teachers, except postsecondary

Teachers, prekindergarten and kindergarten (231)
Teachers, elementary school (232)
Teachers, secondary school (233)
Teachers, special education (235)
Teachers, n.e.c. (236, 239)
Counselors, educational and vocational (24)

Librarians, archivists, and curators

Librarians (251)
Archivists and curators (252)

Social scientists and urban planners

Economists (1912)
Psychologists (1915)
Sociologists (1916)
Social scientists, n.e.c. (1913, 1914, 1919)
Urban planners (192)

Social, recreation, and religious workers

Social workers (2032)
Recreation workers (2033)
Clergy (2042)
Religious workers, n.e.c. (2049)

	Lawyers and judges		Engineering technicians, n.e.c. (3719)
	Lawyers (211)		Drafting occupations (372)
	Judges (212)		Surveying and mapping technicians (373)
	Writers, artists, entertainers, and athletes		Science technicians
	Authors (321)		Biological technicians (382)
	Technical writers (398)		Chemical technicians (3831)
	Designers (322)		Science technicians, n.e.c. (3832, 3833, 384, 389)
	Musicians and composers (323)		Technicians, except health, engineering, and science
	Actors and directors (324)		Airplane pilots and navigators (825)
	Painters, sculptors, craft-artists, and artist printmakers (325)		Air traffic controllers (392)
	Photographers (326)		Broadcast equipment operators (393)
	Dancers (327)		Computer programmers (3971,3972)
	Artists, performers, and related workers, n.e.c. (328,329)		Tool programmers, numerical control (3974)
	Editors and reporters (331)		Legal assistants (396)
	Public relations specialists (332)		Technicians, n.e.c. (399)
	Announcers (333)		
	Athletes (34)		
	TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS	4	<u>Sales Occupations</u>
3	<u>Technicians and Related Support Occupations</u>		Supervisors and proprietors, sales occupations (40)
	Health technologists and technicians		Sales occupations, business goods and services
	Clinical laboratory, technologists, and technicians (362)		Insurance sales occupations (4122)
	Dental hygienists (363)		Real estate sales occupations (4123)
	Health record technologists and technicians (364)		Securities and financial services sales occupations (4124)
	Radiologic technicians (365)		Advertising and related sales occupations (4153)
	Licensed practical nurses (366)		Sales occupations, other business services (4152)
	Health technologists and technicians, n.e.c. (369)		Sales engineers (421)
	Technologists and technicians, except health		Sales representatives, mining, manufacturing, and wholesale (423, 4235)
	Engineering and related technologists and technicians		Sales occupations, personal goods and services
	Electrical and electronic technicians (3711)		Sales workers, motor vehicles and boats (4342, 4344)
	Industrial engineering technicians (3712)		Sales workers, apparel (4346)
	Mechanical engineering technicians (3713)		Sales workers, shoes (4351)
			Sales workers, furniture and home furnishings (4348)

	<p>Sales workers' radio, television, hi-fi, and appliances (4343, 4352)</p> <p>Sales workers, hardware and building supplies (4353)</p> <p>Sales workers, parts (4367)</p> <p>Sales workers, other commodities (4345, 4347, 4354, 4356, 4359, 4349)</p> <p>Sales counter clerks (pt 4363)</p> <p>Cashiers (4364)</p> <p>Street and door-to-door sales workers (4366)</p> <p>News vendors (4365)</p> <p>Sales related occupations</p> <p>Demonstrators, promoters and models, sales (445)</p> <p>Auctioneers (447)</p> <p>Sales support occupations, n.e.c (444, 446, 449)</p>	<p>Records processing occupations, except financial</p> <p>Classified-ad clerks (4662)</p> <p>Correspondence clerks (4663)</p> <p>Order clerks (4664)</p> <p>Personnel clerks, except payroll and timekeeping (4692)</p> <p>Library clerks (4694)</p> <p>File clerks (4696)</p> <p>Records clerks (4699)</p> <p>Financial records processing occupations</p> <p>Bookkeepers, accounting and auditing clerks (4712)</p> <p>Payroll and timekeeping clerks (4713)</p> <p>Billing clerks (4715)</p> <p>Cost and rate clerks (4716)</p> <p>Billing, posting, and calculating machine operators (4718)</p> <p>Duplicating, mail and other office machine operators</p> <p>Duplicating machine operators (4722)</p> <p>Mail preparing and paper handling machine operators (4723)</p> <p>Office machine operators, n.e.c. (4729)</p> <p>Communications equipment operators</p> <p>Telephone operators (4732)</p> <p>Communications equipment operators, n.e.c. (4733, 4739)</p> <p>Mail and message distributing occupations</p> <p>Postal clerks, exc. mail carriers (4742)</p> <p>Mail carriers, postal service (4743)</p> <p>Mail clerks, exc. postal service (4744)</p> <p>Messengers (4745)</p> <p>Material recording, scheduling, and distributing clerks, n.e.c.</p> <p>Dispatchers (4751)</p> <p>Production Coordinators (4752)</p> <p>Traffic, shipping, and receiving clerks (4753)</p> <p>Stock and inventory clerks (4754)</p> <p>Meter readers (4755)</p>
5	<p><u>Administrative Support Occupations, Including Clerical</u></p> <p>Supervisors, administrative support occupations</p> <p>Supervisors, general office (4511, 4513, 4514, 4516, 4519, 4529)</p> <p>Supervisors, computer equipment operators (4512)</p> <p>Supervisors, financial records processing (4521)</p> <p>Chief communications operators (4523)</p> <p>Supervisors; distribution, scheduling, & adjusting clerks (4522, 4524)</p> <p>Computer equipment operators</p> <p>Computer operators (4612)</p> <p>Peripheral equipment operators (4613)</p> <p>Secretaries (4622)</p> <p>Stenographers (4623)</p> <p>Typists (4624)</p> <p>Information clerks</p> <p>Interviewers (4642)</p> <p>Hotel clerks (4643)</p> <p>Transportation ticket and reservation agents (4644)</p> <p>Receptionists (4645)</p> <p>Information clerks, n.e.c. (4649)</p>	

	<p>Weighers, measurers, checkers and samplers (4756, 4757)</p> <p>Expeditors (4758)</p> <p>Material recording, scheduling, and distributing clerks, n.e.c.(4759)</p> <p>Adjusters and investigators</p> <p>Insurance adjusters, examiners, and investigators (4782)</p> <p>Investigators and adjusters, except insurance (4783)</p> <p>Eligibility clerks, social welfare (4784)</p> <p>Bill and account collectors (4786)</p> <p>Miscellaneous administrative support occupations</p> <p>General office clerks (463)</p> <p>Bank tellers (4791)</p> <p>Proofreaders (4792)</p> <p>Data-entry keyers (4793)</p> <p>Statistical clerks (4794)</p> <p>Teachers' aides (4795)</p> <p>Administrative support occupations, n.e.c. (4787,4799)</p>	<p>Firefighting occupations (5123)</p> <p>Police and detectives</p> <p>Police and detectives, public service (5132)</p> <p>Sheriffs, bailiffs, and other law enforcement officers (5134)</p> <p>Correctional institution officers (5133)</p> <p>Guards</p> <p>Crossing guards (5142)</p> <p>Guards and police, exc. public service (5144)</p> <p>Protective service occupations, n.e.c. (5149)</p>
		<p>8 <u>Service Occupations, Except Protective and Private Household</u></p> <p>Food preparation and service occupations</p> <p>Supervisors, food preparation and service occupations (5211)</p> <p>Bartenders (5212)</p> <p>Waiters and waitresses (5213)</p> <p>Cooks (5214, 5215)</p> <p>Food counter, fountain and related occupations (5216)</p> <p>Kitchen workers, food preparation (5217)</p> <p>Waiters'/waitresses' assistants (5218)</p> <p>Miscellaneous food preparation occupations (5219)</p> <p>Health service occupations</p> <p>Dental assistants (5232)</p> <p>Health aides, except nursing (5233)</p> <p>Nursing aides, orderlies, and attendants (5236)</p> <p>Cleaning and building service occupations, except private household</p> <p>Supervisors, cleaning and building service workers (5241)</p> <p>Maids and housemen (5242,5249)</p> <p>Janitors and cleaners (5244)</p> <p>Elevator operators (5245)</p> <p>Pest control occupations (5246)</p>

	Personal service occupations		Forestry and logging occupations
	Supervisors, personal service occupations (5251)		Supervisors, forestry and logging workers (571)
	Barbers (5252)		Forestry workers, except logging (572)
	Hairdressers and cosmetologists (5253)		Timber cutting and logging occupations (573, 579)
	Attendants, amusement and recreation facilities (5254)		
	Guides (5255)		Fishers, hunters, and trappers
	Ushers (5256)		
	Public transportation attendants (5257)		Captains and other officers, fishing vessels (pt 8241)
	Baggage porters and bellhops (5262)		Fishers (583)
	Welfare service aides (5263)		Hunters and trappers (584)
	Family child care providers (pt 5264)		
	Early childhood teacher's assistants (pt 5264)		PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS
	Child care workers, n.e.c. (pt 5264)		
	Personal service occupations, n.e.c. (5258, 5269)	10	Mechanics and repairers
9	FARMING, FORESTRY, AND FISHING OCCUPATIONS		Supervisors, mechanics and repairers (60)
	Farm operators and managers		Mechanics and repairers, except supervisors
	Farmers, except horticultural (5512-5514)		Vehicle and mobile equipment mechanics and repairers
	Horticultural specialty farmers (5515)		
	Managers, farms, except horticultural (5522-5524)		Automobile mechanics (pt 6111)
	Managers, horticultural specialty farms (5525)		Automobile mechanic apprentices (pt 6111)
	Other agricultural and related occupations		Bus, truck, and stationary engine mechanics (6112)
	Farm occupations, except managerial		Aircraft engine mechanics (6113)
	Supervisors, farm workers (5611)		Small engine repairers (6114)
	Farm workers (5612-5617)		Automobile body and related repairers (6115)
	Marine life cultivation workers (5618)		Aircraft mechanics, exc. engine (6116)
	Nursery workers (5619)		Heavy equipment mechanics (6117)
	Related agricultural occupations		Farm equipment mechanics (6118)
	Supervisors, related agricultural occupations (5621)		Industrial machinery repairers (613)
	Groundskeepers and gardeners, except farm (5622)		Machinery maintenance occupations (614)
	Animal caretakers, except farm (5624)		Electrical and electronic equipment repairers
	Graders and sorters, agricultural products (5625)		Electronic repairers, communications and industrial equipment
	Inspectors, agricultural products (5627)		Data processing equipment repairers (6154)
			Household appliance and power tool repairers (6156)

	Telephone line installers and repairers (6157)		Electrical power installers and repairers (6433)
	Telephone installers and repairers (6158)		Painters, construction and maintenance (6442)
	Miscellaneous electrical and electronic equipment repairers (6159)		Paperhangers (6443)
	Heating, air conditioning, and refrigeration mechanics (616)		Plasterers (6444)
	Miscellaneous mechanics and repairers		Plumbers, pipefitters, and steamfitters (pt 645)
	Camera, watch, and musical instrument repairers (6171, 6172)		Plumber, pipefitter, and steam fitter apprentices (pt 645)
	Locksmiths and saw repairers (6173)		Concrete and terrazzo finishers (6463)
	Office machine repairers (6174)		Glaziers (6464)
	Mechanical controls and valve repairers (6175)		Insulation workers (6465)
	Elevator installers and repairers (6176)		Paving, surfacing, and tamping equipment operators (6466)
	Millwrights (6178)		Roofers (6468)
	Specified mechanics and repairers, n.e.c. (6177, 6179)		Sheetmetal duct installers (6472)
	Not specified mechanics and repairers		Structural metal workers (6473)
			Drillers, earth (6474)
			Construction trades, n.e.c. (6467, 6475, 6476, 6479)
		12	<u>Extractive Occupations</u>
11	<u>Construction trades</u>		Supervisors, extractive occupations (632)
	Supervisors, construction occupations		Drillers, oil well (652)
	Supervisors; brickmasons, stonemasons, and tile setters (6312)		Explosives workers (653)
	Supervisors, carpenters and related workers (6313)		Mining machine operators (654)
	Supervisors; electricians and power transmission installers (631)		Mining occupations, n.e.c. (656)
	Supervisors, painters, paperhangers, and plasterers (6315)		Supervisors, production occupations (67, 71)
	Supervisors; plumbers, pipefitters, and steamfitters (6316)		
	Supervisors, n.e.c. (6311, 6318)		Precision metal working occupations
	Construction trades, except supervisors		Tool and die makers (pt 6811)
	Brickmasons and stonemasons (pt 6412, pt 6413)		Tool and die maker apprentices (pt 6811)
	Brickmason and stonemason apprentices (pt 6412, pt 6413)		Precision assemblers, metal (6812)
	Tile setters, hard and soft (pt 6414, pt 6462)		Machinists (pt 6813)
	Carpet installers (pt 6462)		Machinist apprentices (pt 6813)
	Carpenters (pt 6422)		Boilermakers (6814)
	Carpenter apprentices (pt 6422)		Precision grinders, fitters, and tool sharpeners (6816)
	Drywall installers (6424)		Patternmakers and model makers, metal (6817)
	Electricians (6432)		Lay-out workers (6821)
	Electrician apprentices (pt 6432)		Precious stones and metals workers (jewelers) (6822, 6866)
			Engravers, metal (6823)
			Sheet metal workers (pt 6824)
			Sheet metal worker apprentices (pt 6824)
			Miscellaneous precision metal workers (6829)

Precision woodworking occupations

Patternmakers and model makers, wood (6831)

Cabinet makers and bench carpenters (6832)

Furniture and wood finishers (6835)

Miscellaneous precision woodworkers (6839)

Precision textile, apparel, and furnishings machine workers

Dressmakers (pt 6852, pt 7752)

Tailors (pt 6852)

Upholsterers (6853)

Show repairers (6854)

Miscellaneous precision apparel and fabric workers (6856, 6859, 686)

Precision workers, assorted materials

Hand molders and shapers, except jewelers (6861)

Patternmakers, lay-out workers, and cutters (6862)

Optical goods workers (6864, pt 7477, pt 7677)

Dental laboratory and medical appliance technicians (6865)

Bookbinders (6844)

Electrical and electronic equipment assemblers (6867)

Miscellaneous Precision workers,n.e.c. (6869)

Precision food production occupations

Butchers and meat cutters (7271)

Bakers (7272)

Food batchmakers (7273, 7279)

Precision inspectors, testers, and related workers

Inspectors, testers, and graders (6881, 828)

Adjusters and calibrators (6882)

Plant and system operators

Water and sewage treatment plant operators (691)

Power plant operators (pt 693)

Stationary engineers (pt 693, 7668)

Miscellaneous plant and system operators (692, 694,695, 696)

OPERATORS, FABRICATORS, AND LABORERS

13

Machine Operators, Assemblers, and Inspectors

Machine operators and tenders, except precision

Metalworking and plastic working machine operators

Lathe and turning machine set-up operators (7312)

Lathe and turning machine operators (7512)

Milling and planing machine operators (7313, 7513)

Punching and stamping press machine operators (7314, 7317, 7514, 7515)

Rolling machine operators (7316, 7516)

Drilling and boring machine operators (7318, 7518)

Grinding, abrading, buffing, and polishing machine operators (7322)

Forging machine operators (7319, 7519)

Numerical control machine operators (7326)

Miscellaneous metal, plastic, stone, and glass working machine operators (7349)

Fabricating machine operators, n.e.c. (7339,7539)

Molding and casting machine operators (7315, 7342,7515, 7542)

Metal plating machine operators (7343, 7543)

Heat treating equipment operators (7344, 7544)

Miscellaneous metal and plastic processing machine operators (7329)

Woodworking machine operators

Wood lathe, routing, and planing machine operators (7431, 7432, 7439, 7631, 7632)

Sawing machine operators (7433, 7633)

Shaping and joining machine operators (7435, 7635)

Nailing and tacking machine operators (7636)

Miscellaneous woodworking machine operators (7434, 7439, 7634, 76)

Printing machine operators

Printing press operators (7443, 7643)

Photoengravers and lithographers (6842, 7444, 7644)

Typesetters and compositors (6841, 7642)

Miscellaneous printing machine operators (6849, 7449, 7649)

Textile, apparel, and furnishings machine operators

Winding and twisting machine operators (7451, 7651)

Knitting, looping, taping, and weaving machine operators (7452, 7459)

Textile cutting machine operators (7654)

Textile sewing machine operators (7655)

Shoe machine operators (7656)

Pressing machine operators (7657)

Laundering and dry cleaning machine operators (6855, 7658)

Miscellaneous textile machine operators (7459, 7659)

Machine operators, assorted materials

Cementing and gluing machine operators (7661)

Packaging and filling machine operators (7462, 7662)

Extruding and forming machine operators (7463, 7663)

Mixing and blending machine operators (7664)

Separating, filtering, and clarifying machine operators (7476, 7479)

Compressing and compacting machine operators (7467, 7667)

Painting and paint spraying machine operators (7669)

Roasting and baking machine operators, food (7472, 7672)

Washing, cleaning, and pickling machine operators (7673)

Folding machine operators (7474, 7674)

Furnace, kiln, and oven operators, exc. food (7675)

Crushing and grinding machine operators (pt 7477, pt 7677)

Slicing and cutting machine operators (7478, 7678)

Motion picture projectionists (pt 7679)

Photographic process machine operators (6863, 6868, 7671)

Miscellaneous machine operators, n.e.c. (pt 7479, 7665, 7679)

Machine operators, not specified

Fabricators, assemblers, and hand working occupations

Welders and cutters (7332, 7532, 7714)

Solderers and brazers (7333, 7533, 7717)

Assemblers (772, 774)

Hand cutting and trimming occupations (7753)

Hand molding, casting, and forming occupations (7754, 7755)

Hand painting, coating, and decorating occupations (7756)

Hand engraving and printing occupations (7757)

Miscellaneous hand working occupations (7758, 7759)

Production inspectors, testers, samplers, and weighers

Production inspectors, checkers, and examiners (782, 787)

Production testers (783)

Production samplers and weighers (784)

Graders and sorters, except agricultural (785)

14

Transportation and Material Moving Occupations

Motor vehicle operators

Supervisors, motor vehicle operators (8111)

Truck drivers (8212-8214)

Driver-sales workers (8218)

Bus drivers (8215)

Taxi cab drivers and chauffeurs (8216)

Parking lot attendants (874) Motor transportation occupations, n.e.c. (8219)		Helpers, construction trades (8641-8645, 8648) Helpers, surveyors (8646)
Transportation occupations, except motor vehicles		Helpers, extractive occupations (865) Construction laborers (871) Production helpers (861, 862)
Rail transportation occupations		Freight, stock, and material movers, hand
Railroad conductors and yardmasters (8113)		Garbage collectors (8722)
Locomotive operating occupations (8232)		Stevedores (8723)
Railroad brake, signal, and switch operators (8233)		Stock handlers and baggers (8724)
Rail vehicle operators, n.e.c. (8239)		Machine feeders and offbearers (8725)
Water transportation occupations		Freight, stock, and material handlers, n.e.c. (8726)
Ship captains and mates, except fishing boats (8241,8242)		Garage and service station related occupations (873)
Sailors and deckhands (8243)		Vehicle washers and equipment cleaners (875)
Marine engineers (8244)		Hand packers and packagers (8761)
Bridge, lock, and lighthouse tenders (8245)		Laborers, except construction (8769)
Materials moving equipment operators	16	MILITARY
Supervisors, material moving equipment operators (812)		Military occupation, rank not specified
Operating engineers (8312)	990	OCCUPATION NOT REPORTED ¹
Longshore equipment operators (8313)		
Hoist and winch operators (8314)		
Crane and tower operators (8315)		
Excavating and loading machine operators (8316)		
Grader, dozer, and scraper operators (8317)		
Industrial truck and tractor equipment operators (8318)		
Miscellaneous material moving equipment operators (8319)		
15 <u>Handlers, Equipment Cleaners, Helpers, and Laborers</u>		
Supervisors, handlers, equipment cleaners, and laborers, n.e.c. (85)		
Helpers, construction and extractive occupations		
Helpers, mechanics and repairers (863)		

¹Code used when not-reported cases are not allocated

APPENDIX C

Industrial Classification System

INDUSTRIAL CLASSIFICATION SYSTEM

Equivalent numeric codes follow the alphabetic code. Either code may be used, depending on the processing method. Numbers in parentheses following the industry categories are the SIC definitions. The abbreviation "pt" means "part" and "n.e.c." means "not elsewhere classified."

Industry Code	Industrial Category	Industry Code	Industrial Category
1	AGRICULTURE, FORESTRY, AND FISHERIES Agricultural production, crops (01) Agricultural production, livestock (02) Veterinary services (074) Landscape and horticultural services (078) Agricultural services, n.e.c. (071, 072, 075, 076) Forestry (08) Fishing, hunting, and trapping (09)		Apparel and other finished textile products Apparel and accessories, except knit (231-238) Miscellaneous fabricated textile products (239) Paper and allied products Pulp, paper, and paperboard mills (261-263) Miscellaneous paper and pulp products (267) Paperboard containers and boxes (265) Printing, publishing and printing Newspaper publishing and printing (271) Printing, publishing, and allied industries, except newspapers (272) Chemicals and allied products Plastics, synthetics, and resins (282) Drugs (283) Soaps and cosmetics (284) Paints, varnishes, and related products (285) Agricultural chemicals (287) Industrial and miscellaneous chemicals (281, 286, 289) Petroleum and coal products Petroleum refining (291) Miscellaneous petroleum and coal products (295, 299) Rubber and miscellaneous plastics products Tires and inner tubes (301) Other rubber products, and plastics footwear and belting (301) Miscellaneous plastics products (308) Leather and leather products Leather tanning and finishing (311) Footwear, except rubber and plastic (313, 314) Leather products, except footwear (315-317, 319)
2	MINING Metal mining (10) Coal mining (12) Oil and gas extraction (13) Nonmetallic mining and quarrying, except fuel (14)		
3	CONSTRUCTION (15, 16, 17) MANUFACTURING		
4	<u>Nondurable Goods</u> Food and kindred products Meat products (201) Dairy products (202) Canned, frozen, and preserved fruits and vegetables (203) Grain mill products (204) Bakery products (205) Sugar and confectionery products (206) Beverage industries (208) Miscellaneous food preparations and kindred products (207, 209) Not specified food industries Tobacco manufactures (21) Textile mill products Knitting mills (225) Dyeing and finishing textiles, except wool and knit goods (226) Carpets and rugs (227) Yarn, thread, and fabric mills (228, 221-224) Miscellaneous textile mill products (229)		5 <u>Durable Goods</u> Lumber and wood products, except furniture Logging (241) Sawmills, planing mills, and millwork (242, 243) Wood buildings and mobile homes

(245)
 Miscellaneous wood products (244, 249)
 Furniture and fixtures (25)
 Stone, clay, glass, and concrete products
 Glass and glass products (321-323)
 Cement, concrete, gypsum, and plaster products (324, 327)
 Structural clay products (325)
 Pottery and related products (326)
 Miscellaneous nonmetallic mineral and stone products (328, 329)
 Metal industries
 Blast furnaces, steelworks, rolling and finishing mills (331, 333)
 Iron and steel foundries (332)
 Primary aluminum industries (3334, pt 334, 3353-3355, 3363, 3365)
 Other primary metal industries (3331, 3339, pt 334, 3351, 3366)
 Cutlery, handtools, and general hardware (342)
 Fabricated structural metal products (344)
 Screw machine products (345)
 Metal forgings and stampings (346)
 Ordnance (348)
 Miscellaneous fabricated metal products (341, 343, 347, 349)
 Not specified metal industries
 Machinery, except electrical
 Engines and turbines (351)
 Farm machinery and equipment (352)
 Construction and material handling machines (353)
 Metalworking machinery (354)
 Office and accounting machines, (3578, 3579)
 Computers and related equipment (3571-3577)
 Machinery, except electrical, n.e.c. (355, 356, 358, 359)
 Not specified machinery
 Electrical machinery, equipment, and supplies
 Household appliance (363)
 Radio, TV, and communication equipment (365, 366)
 Electrical machinery, equipment, and supplies, n.e.c. (361, 362)
 Not specified electrical machinery, equipment, and supplies
 Transportation equipment
 Motor vehicles and motor vehicle equipment (371)
 Aircraft and parts (372)
 Ship and boat building and repairing (373)

Railroad locomotives and equipment (374)
 Guided missiles, space vehicles, and parts (376)
 Cycles and miscellaneous transportation equipment (375, 379)
 Professional and photographic equipment, and watches
 Scientific and controlling instruments (381, 382, exc. 3827)
 Medical, dental, and optical instruments and supplies (3827, 3829)
 Photographic equipment and supplies (386)
 Watches, clocks, and clockwork operated devices (387)
 Toys, amusement, and sporting goods (394)
 Miscellaneous manufacturing industries (39 exc. 394)
 Not specified manufacturing industries

6

TRANSPORTATION, COMMUNICATIONS, AND OTHER PUBLIC UTILITIES

Transportation
 Railroads (40)
 Bus service and urban transit (41, exc. 412)
 Taxicab service (412)
 Trucking service (421, 423)
 Warehousing and storage (422)
 U.S. Postal Service (43)
 Water transportation (44)
 Air transportation (45)
 Pipe lines, except natural gas (46)
 Services incidental to transportation (47)
 Communications
 Radio and television broadcasting and cable (483, 484)
 Telephone communications (481)
 Telegraph and miscellaneous communication services (482, 489)
 Utilities and sanitary services
 Electric light and power (491)
 Gas and steam supply systems (492, 496)
 Electric and gas, and other combinations (493)
 Water supply and irrigation (494, 497)
 Sanitary services (495)
 Not specified utilities

WHOLESALE TRADE

7

Durable Goods

Motor vehicles and equipment (501)

	Furniture and home furnishings (502)		Music stores (5735, 5736)
	Lumber and construction materials (503)		Eating and drinking places (58)
	Professional and commercial equipment and supplies (504)		Drug stores (591)
	Metals and minerals, except petroleum (505)		Liquor stores (592)
	Electrical goods (506)		Sporting goods, bicycles, and hobby stores (5941, 5945, 5946)
	Hardware, plumbing and heating supplies (507)		Book and stationery stores (5942, 5943)
	Machinery, equipment, and supplies (508)		Jewelry stores (5944)
	Scrap and waste materials (5093)		Gift, novelty, and souvenir shops (5947)
	Miscellaneous wholesale, durable goods (509, exc. 5093)		Sewing, needlework, and piece goods stores (5949)
8	<u>Nondurable goods</u>		Catalog and mail order houses (5961)
	Paper and paper products (511)		Vending machine operators (5962)
	Drugs, chemicals, and allied products (512, 516)		Direct selling establishments (5963)
	Apparel, fabrics, and notions (513)		Fuel dealers (598)
	Groceries and related products (514)		Retail florists (5992)
	Farm-product raw materials (515)	10	Miscellaneous retail stores (593, 5948, 5993-5995, 5999)
	Petroleum products (517)		Not specified retail trade
	Alcoholic beverages (518)		
	Farm supplies (5191)		FINANCE, INSURANCE, AND REAL ESTATE
	Miscellaneous wholesale, nondurable goods (5192-5199)		Banking (60 exc. 603 and 606)
	Not specified wholesale trade		Savings institutions, including credit unions (603, 606)
9	RETAIL TRADE		Credit agencies, n.e.c. (61)
	Lumber and building material retailing (521, 523)		Security, commodity brokerage, and investment companies (62, 67)
	Hardware stores (525)		Insurance (63, 64)
	Retail nurseries and garden stores (526)		Real estate, including real estate-insurance offices (65)
	Mobile home dealers (527)	11	BUSINESS AND REPAIR SERVICES
	Department stores (531)		Advertising (731)
	Variety stores (533)		Services to dwellings and other buildings (734)
	Miscellaneous general merchandise stores (539)		Personnel supply services (736)
	Grocery stores (541)		Computer and data processing services (737)
	Dairy products stores (545)		Detective and protective services (7381, 7382)
	Retail bakeries (546)		Business services, n.e.c. (732, 733, 735, 7383-7389)
	Food stores, n.e.c. (542, 543, 544, 549)		Automotive rental and leasing, without drivers (751)
	Motor vehicle dealers (551, 552)		Automobile parking and carwashes (752, 7542)
	Auto and home supply stores (553)		Automotive repair and related services (753, 7549)
	Gasoline service stations (554)		Electrical repair shops (762, 7694)
	Miscellaneous vehicle dealers (555, 556, 557, 559)		Miscellaneous repair services (763, 764, 7692, 7699)
	Apparel and accessory stores, except shoe (56, except 566)		
	Shoe stores (566)	12	PERSONAL SERVICES
	Furniture and home furnishings stores (571)		
	Household appliance stores (572)		
	Radio, TV, and computer stores (5731, 5734)		

INDUSTRIAL CLASSIFICATION SYSTEM

	Private households (88)	services (871)
	Hotels and motels (701)	Accounting, auditing, and bookkeeping services (872)
	Lodging places, except hotels and motels (702, 703, 704)	Research, development, and testing services (873)
	Laundry, cleaning, and garment services (721 exc pt 7219)	Management and public relations services (874)
	Beauty shops (723)	Miscellaneous professional and related services (899)
	Barber shops (724)	
	Funeral service and crematories (726)	
	Shoe repair shops (725)	
	Dressmaking shops (pt 7219)	
	Miscellaneous personal services (722, 729)	
13	ENTERTAINMENT AND RECREATION SERVICES	15 PUBLIC ADMINISTRATION
	Theaters and motion pictures (781-783, 792)	Executive and legislative offices (911-913)
	Video tape rental (784)	General government, n.e.c. (919)
	Bowling centers (793)	Justice, public order, and safety (92)
	Miscellaneous entertainment and recreation services (791, 794, 799)	Public finance, taxation, and monetary policy (93)
		Administration of human resources programs (94)
		Administration of environmental quality and housing programs (95)
		Administration of economic programs (96)
14	PROFESSIONAL AND RELATED SERVICES	National security and international affairs (97)
	Offices and clinics of physicians (801, 803)	
	Offices and clinics of dentists (802)	16 MILITARY DUTY
	Offices and clinics of chiropractors (8041)	Army
	Offices and clinics of optometrists (8042)	Air Force
	Offices and clinics of health practitioners, n.e.c. (8043, 8049)	Navy
	Hospitals (806)	Marine
	Nursing and personal care facilities (805)	Coast Guard
	Health services, n.e.c. (807, 808, 809)	Armed Forces, Branch not specified
	Legal services (81)	Military Reserves or National Guard
	Elementary and secondary schools (821)	
	Colleges and universities (822)	990 INDUSTRY NOT REPORTED
	Vocational schools (824)	
	Libraries (823)	
	Educational services, n.e.c. (829)	
	Job training and vocational rehabilitation services (833)	
	Child day care services (pt 835)	
	Family child care homes (pt 835)	
	Residential care facilities, without nursing (836)	
	Social services, n.e.c. (832, 839)	
	Museums, art galleries, and zoos (84)	
	Labor unions (863)	
	Religious organization (866)	
	Membership organizations, n.e.c. (861, 862, 864, 865, 869)	
	Engineering, architectural, and surveying	

¹Code used when not reported cases are not allocated.

APPENDIX D

Drug Codes for Open-Ended Questions

APPENDIX D

Drug Codes for Open-Ended Questions (1998 NHSDA)

Numerical Listing

101 = Butisol	148 = Actifed <OTC>
102 = Buticaps	149 = Ekilid [sic] 50
103 = Amytal	150 = Weed.Cote [sic]
104 = Mebaral	151 = VOEOBO [sic]
105 = Placidyl	152 = Eskabarb
106 = Doriden	153 = Luminal
107 = Noludar	154 = Alurate
108 = Carbrital, Nembutal	155 = Pasatorim [sic]
109 = Seconal	156 = Sodium barbitol
110 = Tuinal, Rainbows	157 = Barbiturates
111 = Dalmane, Durapam	158 = Calmociteno (in Brazil)
112 = Rasepam, Restoril, Temaz, Temazepam	159 = Octanox
113 = Halcion	160 = Relanium [sic]
114 = Amobarbital	161 = Rohypnol, Roofies, Rope, Roples, Rufinal [sic], Rufonol [sic] [see also 168, 483]
115 = Phenobarbital	162 = Ambramine [sic] 500
116 = Methaqualone, Parest, Quaalude, Sopor	163 = Blue meanies
117 = Chloral hydrate, Noctec	164 = Yellow zombies
118 = Pentobarbital, Pentothal, Sodium pentothal	165 = Trips
119 = Secobarbital	166 = Roinol [sic]
120 = Downers; OTHER Sedative, NOT SPECIFIED	167 = Dumolid [sic]
121 = USED SEDATIVE, DON'T KNOW NAME	168 = Rahypnol, Rohybenol [sic], Ruhibinol [sic] [see also 161, 483]
122 = Sleep Aid <OTC>	169 = Dolestan [sic] <German OTC>
123 = Unisom <OTC>	170 = Popey [sic]
124 = Yellow jackets	171 = NyQuil <OTC>
125 = Qulande [sic]	172 = Dream Ease <OTC>
126 = Somenex [sic], Sominex <OTC>	173 = Wafers
127 = Nytol <OTC>	174 = Ambien, Zolpidem
128 = Nervine <OTC>	175 = Ayerst 430 [sic]
129 = Reds	176 = Melatonin <OTC>
130 = Phenergan	177 = Bean
131 = Haldol, Haloperidol	
132 = Sleepettes [sic] <OTC>	
133 = Ryoxine [sic]	
134 = Diasetan [sic]	
135 = Mini Thins	201 = Valium
136 = Dimetapp	202 = Librium, Chlordiazepoxide HCL
137 = 7-14	203 = Libritabs, Limbitrol, Mitran [see also 276]
138 = Mandrax [sic], Mandrix [sic], Manerix	204 = Menrium
139 = Black widows	205 = Serax
140 = Seldane	206 = Tranxene
141 = Dilantin	207 = Ativan
142 = Belladona	208 = Centrax
143 = Sedoxen [sic]	209 = Xanax
144 = Reynolds [sic]	210 = Paxipam
145 = Red devil(s)	211 = Buspar
146 = Bently, Dicyclomine	212 = Miltown
147 = Nicol [sic]	

213	=	Equanil	269	=	Pasidrin (in Mexico)
214	=	Deprol	270	=	Torzien
215	=	Vistaril	271	=	Zoloft
216	=	Atarax	272	=	Megadon [sic], Mogadon, Nitrazepam
217	=	Durrax	273	=	Insidod [sic], Insidon [sic]
218	=	Diazepam	274	=	Nipam [sic]
219	=	SK-Lygen	275	=	Loxitane
220	=	Meprobamate, Meprospan	276	=	Limbitrol DS (chlordiazepoxide and amitriptyline) [see also 203]
221	=	OTHER Tranquilizer, NOT SPECIFIED	277	=	Altut (Spanish)
222	=	USED TRANQUILIZER, DON'T KNOW NAME	278	=	Benzodiazepines
223	=	Carbacot, Delaxin, Marbaxin, Methocarbamol, Robamol, Robaxin, Robomol	279	=	Tridhorzapams [sic]
224	=	Triavil	280	=	Ketaset [sic]
225	=	Desyrel, Trazodone hydrochloride, Trazora, Trialodine	281	=	Blue ringer
226	=	Stelazine, Trifluoperazine HCl	282	=	Clozapine, Clozaril
227	=	Thorazine	283	=	Paroxetine, Paxil
228	=	Amitriptyline [see also 239]	284	=	Tofranil
229	=	Librax	285	=	Risperdal, resperidone
230	=	Compazine	286	=	Dan [sic]
231	=	MS [sic]	287	=	Mylan [sic]
232	=	Mellaril			
233	=	Trilafon	301	=	Dexedrine
234	=	Cyclobenzaprine, Flexeril	302	=	Dexamyl
235	=	Imipramine	303	=	Eskatrol
236	=	Avatir [sic]	304	=	Benzedrine
237	=	Versed	305	=	Biphetamine
