***** Processor Notes *****

(1) The web-accessible public use data, produced by the Substance Abuse and Mental Health Data Archive (SAMHDA), were collected and computed using cost accounting spreadsheets developed by the Substance Abuse and Mental Health Services Administration (SAMHSA) Center for Substance Abuse Treatment (CSAT). These data collection templates are part of an ongoing integrated evaluation method called the Substance Abuse Treatment Cost Allocation and Analysis Template (SATCAAT).

(2) The two data files in this collection cannot be combined or matched. They include comparable variables, but were derived using different calculation methods. While the Residential Women and Children (RWC) data file (part 1) combines the costs and units for women and children, the SDU Cost data file (part 2) separates these data for women and children (as well as all others).
