Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Research Subjects

Any intentional identification of a research subject (whether an individual or an organization) or unauthorized disclosure of his or her confidential information violates the promise of confidentiality given to the providers of the information. Disclosure of confidential information may also be punishable under federal law. Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for re-identification of specific research subjects.
- To make no use of the identity of any research subject discovered inadvertently and to report any such discovery to CBHSQ and SAMHDA (samhda-support@samhsa.hhs.gov)

Citing Data

You agree to reference the recommended bibliographic citation in any of your publications that use SAMHDA data. Authors of publications that use SAMHDA data are required to send citations of their published works for inclusion in a database of related publications.

Disclaimer

You acknowledge that SAMHSA will bear no responsibility for your use of the data or for your interpretations or inferences based upon such uses.

Violations

If CBHSQ determines that this terms of use agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution. A range of sanctions are available to institutions including revocation of tenure and termination.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections. This may result in an investigation of the user's institution, which can result in institution-wide sanctions including the suspension of all research grants.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

Promise of confidentiality

A promise to a respondent or research participant that the information the respondent provides will not be disseminated in identifiable form without the permission of the respondent; that the fact that the respondent participated in the study will not be disclosed; and that disseminated information will include no linkages to the identity of the respondent. Such a promise encompasses traditional notions of both confidentiality and anonymity. In most cases, federal law protects the confidentiality of the respondent's identity as referenced in the Promise of Confidentiality. Under this condition, names and other identifying information regarding respondents would be confidential.

Research subject
A person or organization that participates in a research study. A research subject may also be called a respondent. A respondent is generally a survey respondent or informant, experimental or observational subject, focus group participant, or any other person providing information to a study.

TREATMENT EPISODE DATA SET – ADMISSIONS CODEBOOK, 1999

Introduction

This codebook is for the Treatment Episode Data Set – Admissions (TEDS-A) for admissions to substance abuse treatment occurring in 1999. TEDS-A provides demographic and substance abuse characteristics of admissions to alcohol or drug treatment in facilities that report to individual state administrative data systems.

The TEDS system is comprised of two major components, the Admissions Data Set and the Discharges Data Set. The TEDS-Admissions (TEDS-A) file is an established program; data were first reported for TEDS-A in 1992. The TEDS-D began more recently, with the first data reported in 2000. TEDS includes treatment data that are routinely collected by states to monitor their individual substance abuse treatment systems. Selected data items from the individual state data files are converted to a standardized format that is consistent across states. These standardized data constitute TEDS.

The TEDS-A is comprised of a Minimum Data Set collected by all states, and a Supplemental Data Set collected by some states. The Minimum Data Set consists of 19 items that include:

- Demographic information;
- Primary, secondary, and tertiary substances used by the subject, and their route of administration, frequency of use, and age at first use;
- Source of referral to treatment;
- Number of prior treatment episodes; and
- Service type, including planned use of medication-assisted (i.e., with methadone or buprenorphine) opioid therapy.

The 15 Supplemental Data Set items include psychiatric, social, and economic measures.

A full list of the variables can be viewed in the Variable Information and Frequency sections of this codebook.

This codebook provides background and descriptive information for the TEDS-A public-use files, limitations of the data, and frequencies. References are available detailing the data collected in each state with the TEDS data elements, including state-by-state descriptions of exceptions or anomalies in reporting practices. Users may refer to the TEDS Crosswalks available from SAMHSA. The crosswalks are frequently updated as new information becomes available.

Since 1992, the Office of Applied Studies (OAS) of the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (DHHS) has funded and been responsible for TEDS. It coordinates and manages the collection of TEDS data from the states. In 2010, the OAS was renamed to the Center for Behavioral Health Statistics and Quality (CBHSQ). The unit of analysis is treatment admissions to state-licensed or

certified substance abuse treatment centers that receive federal public funding.

Descriptive and analytical reports from TEDS are developed by CBHSQ to provide national and state-level data on the number and types of clients treated and the characteristics of facilities providing services.

Data Collection

The "Treatment Episode Data Set State Instruction Manual – Admissions Data" is available from the SAMHSA Web site and provides complete instructions on how the TEDS-A data are processed and submitted by the states.

Confidentiality Protection

Several measures were taken to protect the confidentiality of the TEDS-A records. Variables that potentially identify an individual in their raw form underwent routine top- or bottom-coding in order to prevent high and low codes from distinguishing a respondent's record. For example, AGE as a continuous variable has the potential to identify both the youngest and oldest participants in a public release file. Hence, AGE was recoded into 11 categories for the public-use file to reduce disclosure risk. The lowest category for age combines the ages of *12-14*. Similarly, ages of *55 and older* were top-coded. All the variables recoded are documented in Appendix B.

Disclosure analysis is used to identify records that remained unique after routine measures were taken to protect confidentiality. Disclosure analysis is used to discern combinations of indirect identifiers that potentially link an individual to a record. Particular attention was given to the analytic importance of geographic data and of subgroup populations. Consequently, data swapping was applied to the TEDS in order to satisfy stringent confidentiality standards while preserving the analytic value of the public-use file.

The original location of a record in TEDS-A cannot be known for certain due to the use of data swapping. This method has several benefits over other disclosure protection options: (1) the overall impact to the data is typically small; (2) nearly all of the data are left intact; (3) data for special populations (e.g., minorities, pregnant women) are no more impacted than other data; (4) the procedures typically do not affect any analytic uses of the file; and (5) the procedures allow greater detail to remain on the public use file (e.g., the original ethnicity codes).

Universe

The universe for TEDS-A is admissions in calendar year 1999 that were received and processed through April 11, 2005.

Coverage

The TEDS attempts to include all admissions to providers receiving public funding. Because each state or jurisdiction decides the TEDS eligibility of a provider, there is no independent check on the actual sources of funding. Although SAMHSA requests submission of TEDS data on all admissions to any publicly funded treatment facility, reporting in some state agencies is structured so that only clients treated with public funds are included in the TEDS. The number of clients in these facilities whose treatment is not publicly funded is unknown.[1]

Data Limitations

The TEDS, while comprising a significant proportion of all admissions to substance abuse treatment, does not include all such admissions. The TEDS is a compilation of facility data from state administrative systems. The scope of facilities included in the TEDS is affected by differences in state licensure, certification, accreditation, and disbursement of public funds. For example, some state substance abuse agencies regulate private facilities and individual practitioners, while others do not. In some states, hospital-based substance abuse treatment facilities are not licensed through the state substance abuse agency. Some state substance abuse agencies track treatment in correctional facilities (state prisons and local jails), while others do not.

In general, facilities reporting TEDS data receive state alcohol and/or drug agency funds (including Federal Block Grant funds) for the provision of alcohol and/or drug treatment services. Most states are able to report all admissions to all eligible facilities, although some report only admissions financed by public funds. States may report data from facilities that do not receive public funds, but generally do not because of the difficulty in obtaining data from these facilities. The TEDS generally does not include data on facilities operated by federal agencies, including the Bureau of Prisons, the Department of Defense, and the Department of Veterans Affairs. However, some facilities operated by the Indian Health Service are included.

The primary goal of TEDS is to monitor the characteristics of treatment episodes for substance abusers. Implicit in the concept of treatment is a planned, continuing treatment regimen. Thus, the TEDS does not include early intervention programs; these are considered to be prevention programs. Crisis intervention facilities such as sobering-up stations and hospital emergency departments are not included in the TEDS.

The TEDS is a large and powerful data set. Like all data sets, however, care must be taken that interpretation does not extend beyond the limitations of the data. Limitations fall into two broad

categories: those related to the scope of the data collection system, and those related to the difficulties of aggregating data from highly diverse state data collection systems.[2]

Limitations to be kept in mind while analyzing TEDS data include:

- The number and client mix of TEDS records depends, to some extent, on external factors - including the availability of public funds. In states with higher funding levels, a larger percentage of the substance abusing population may be admitted to treatment, including the less severely impaired and the less economically disadvantaged.

- The primary, secondary, and tertiary substances of abuse reported to the TEDS are those substances that led to the treatment episode, and not necessarily a complete enumeration of all drugs used at the time of admission.

- The way an admission is defined may vary from state to state such that the absolute number of admissions is not a valid measure for comparing states.

- States continually review the quality of their data processing. As systematic errors are identified, revisions may be enacted in historical TEDS data files. While this system improves the data set over time, reported historical statistics may change slightly from year to year.

- States vary in the extent to which coercion plays a role in referral to treatment. This variation derives from criminal justice practices and differing concentrations of abuser subpopulations.

- Public funding constraints may direct states to selectively target special populations, for example, pregnant women or adolescents.

- TEDS includes treatment admissions and in many states the files may *include multiple admissions for the same client*. Therefore, any statistics derived from the data will represent admissions, not clients. It is possible for clients to have multiple initial admissions within a state and even within providers that have multiple treatment sites within the state. A few states uniquely identify clients at the state-level and several more states are attempting to achieve this level of client identification. The TEDS provides a good national snapshot of what is seen at admission to treatment, but is currently unable to follow individual clients through a sequence of treatment episodes.

- The TEDS distinguishes between "transfer admissions" and "initial admissions." Transfer admissions include clients transferred for distinct services within an episode of treatment. Only initial admissions are included on the public use files.

- Some states have no Opioid Treatment Programs (OTPs) that provide medication-assisted therapy using methadone and/or buprenorphine. See the TEDS state-by-state crosswalk for information regarding data collected by each state.

Created Variables

The TEDS files contain several variables created from the original variables submitted by the states. For example, a variable was created to indicate whether each drug was included as a primary, secondary, or tertiary drug of abuse. These are called *flag* variables and labeled according to the drug, such as *alcflg* for alcohol flag variable, *cokeflg* for cocaine flag, etc.

A variable that facilitates comparison of each state to all other states is included in the Survey Documentation and Analysis (SDA) online data analysis files for TEDS. These created variables are referred to as *geographic state indicator variables* and labeled according to state name such as *AKSTATE* for Alaska and *ALSTATE* for Alabama. These variables are useful for examining characteristics of treatment in one state compared to the rest of the nation. The *state indicator variables* are not included in the downloadable data files for TEDS because they approximately double the size of the files, which are large at the outset due to the number of TEDS records. Therefore, sample SPSS programming syntax is provided below in order to create and append the state indicator variable to downloaded files:

```
* Compute TEDS state indicator for Alaska (STFIPS=2).

do if (STFIPS eq 2).
compute AKSTATE=1.
else.
compute AKSTATE=2.
end if.

variable labels   AKSTATE "ALASKA STATE INDICATOR".

value labels  AKSTATE   1 "ALASKA"   2 "ALL OTHER STATES".

format AKSTATE (f1.0).
```

Contents of Public-Use Files

The TEDS public use file contains Minimum, Supplemental, and Additional data for 50 states plus the District of Columbia. Puerto Rico did not report usable data in 1999.

The TEDS Admissions public-use files are provided in ASCII rectangular format with SAS, SPSS and Stata data definition statements. SAS Transport (CPORT), SPSS System, Stata System, and ASCII Tab-delimited files are also available. Supplemental files containing optional

commands are available for the SAS Transport and Stata System files. A separate codebook is provided for each year's data file. The number of observations and variables for 1999 are as follows:

Filename: da03314-0001.txt
Number of observations: 1,715,336
Number of variables: 62
Records per case: 1
Logical record length: 120

User Responsibility

Users are reminded that the data are to be used solely for statistical analysis and reporting of aggregated information and not for investigation or identification of specific individuals or organizations.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

RACE	RACE

Question:	

Specifies the client's race:

 - ALASKA NATIVE (ALEUT, ESKIMO, INDIAN): Origins in any of
   the original people of Alaska.

 - AMERICAN INDIAN (OTHER THAN ALASKA NATIVE): Origins in
   any of the original people of North America and South
   America (including Central America) and who maintain
   cultural identification through tribal affiliation or
   community attachment.

 - ASIAN OR PACIFIC ISLANDER: Origins in any of the original
   people of the Far East, the Indian subcontinent, Southeast
   Asia, or the Pacific Islands.

 - BLACK OR AFRICAN AMERICAN: Origins in any of the black
   racial groups of Africa.

 - WHITE: Origins in any of the original people of Europe,
   North Africa, or the Middle East.

 - ASIAN: Origins in any of the original people of the Far
   East, the Indian subcontinent, or Southeast Asia, including
   for example, Cambodia, China, India, Japan, Korea, Malaysia,
   Philippine Islands, Thailand, and Vietnam.

 - OTHER SINGLE RACE: Use this category for instances
   in which the client is not classified in any category
   above or whose origin group, because of area custom,
   is regarded as a racial class distinct from the above
   categories. (Do not use this category for clients
   indicating multiple races.)

- TWO OR MORE RACES: Use this code when the State data system
  allows multiple race selection and more than one race is
  indicated.

- NATIVE HAWAIIAN OR OTHER PACIFIC ISLANDER: Origins in any
  of the original peoples of Hawaii, Guam, Samoa, or other
  Pacific Islands.

Guidelines: If the State does not distinguish between American
Indian and Alaska Native, code both as 02, American Indian.
States that can separate "Asian" and "Native Hawaiian or Other
Pacific Islander" should use codes 13 and 23 for those
categories. States that cannot make the separation should use
the combined code 03 until the separation becomes possible.
Once a state begins using codes 13 and 23, code 03 should no
longer be used by that state. States are asked to convert to
the new categories when possible.

Location: 19-20 (width: 2; decimal: 0)

Variable Type: numeric

Range of Missing Values (M): -9

Question:

Specifies client's specific Hispanic origin, if applicable.

- PUERTO RICAN: Of Puerto Rican origin, regardless of race.

- MEXICAN: Of Mexican origin, regardless of race.

- CUBAN: Of Cuban origin, regardless of race.

- OTHER SPECIFIC HISPANIC: Of known Central or South American
  or any other Spanish cultural origin (including Spain),
  other than Puerto Rican, Mexican, or Cuban, regardless of

race.

- NOT OF HISPANIC ORIGIN:

- HISPANIC, SPECIFIC ORIGIN NOT SPECIFIED: Of Hispanic origin,
  but specific origin not known or not specified.

Guidelines: If a state does not collect specific Hispanic
detail, code ethnicity for Hispanics as 06, "Hispanic,
specific origin not specified."

Variable Type:	numeric
Range of Missing Values (M):	-9
Question:	

Describes the client's marital status. The following
categories are compatible with the U.S. Census.

- NEVER MARRIED: Includes clients whose only marriage was
  annulled.

- NOW MARRIED: Includes those living together as married.

- SEPARATED: Includes those separated legally or otherwise
  absent from spouse because of marital discord.

EDUC	EDUCATION

Location:	23-24 (width: 2; decimal: 0)
Variable Type:	numeric
Range of Missing Values (M):	-9
Question:	

Specifies the highest school grade (number of school years) completed by the client.

Guidelines: States that use specific categories for designating education level should map their categories to a logical "number of years of school completed." The mapping should be recorded in the State Crosswalk. For example, a state category of "Associate Degree" should be mapped to 14; "Bachelor Degree" would be mapped to 16, etc.

Value	Label	Unweighted Frequency	%	Valid %
1	8 YEARS OR LESS	156576	9.1 %	9.4%

EMPLOY	EMPLOYMENT STATUS

Location:	25-26 (width: 2; decimal: 0)
Variable Type:	numeric
Range of Missing Values (M):	-9
Question:	

Designates the client's employment status at the time of admission or transfer:

 - FULL TIME: Working 35 hours or more each week; including active duty members of the uniformed services.

 - PART TIME: Working fewer than 35 hours each week.

 - UNEMPLOYED: Looking for work during the past 30 days or on layoff from a job.

 - NOT IN LABOR FORCE: Not looking for work during the past 30 days or a student, homemaker, disabled, retired, or an inmate of an institution. Clients in this category are further defined in the Supplemental Data Set item "Detailed Not in Labor Force" (DETNLF).

Guidelines: Seasonal workers are coded in this category based on their employment status at time of admission. For example,

if they are employed full time at the time of admission, they are coded as 01. If they are not in labor force at time of admission, they are coded 04.

Value	Label	Unweighted Frequency	%	Valid %
1	FULL TIME	419410	24.5 %	25.6%

CBSA	FIPS 2000 CBSA CODE

Location:	39-43 (width: 5; decimal: 0)
Variable Type:	numeric
Range of Missing Values (M):	-9
Question:	The term "Core Based Statistical Area" (CBSA) is a collective term for both metro and micro areas. Metropolitan and micropolitan statistical areas (metro and micro areas) are geographic entities defined by the U.S. Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population, and a micro area contains an urban core of at least 10,000 (but less than 50,000) population. Each metro or micro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.

Question:	According to the U.S. Bureau of the Census, if an area that qualifies as a Metropolitan Area (MA) has more than one million persons, PMSAs may be defined within it. PMSAs consist of a large urbanized county or cluster of counties that demonstrates very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSAs are established, the larger area of which they are component parts is designated a consolidated metropolitan statistical area (CMSA). In New England States, metropolitan areas follow the New England County Metropolitan Area (NECMA) definition.

DIVISION	CENSUS DIVISION

Location: 50-51 (width: 2; decimal: 0)

Variable Type: numeric

Range of Missing Values (M):   -9

Question:

CENSUS DIVISION: Census divisions are groupings of states
that are subdivisions of the four census regions. There are
nine divisions, which the Census Bureau adopted in 1910 for
the presentation of data. The divisions and the states
included in them are:

 - U.S. TERRITORIES: Puerto Rico

 - NEW ENGLAND: Connecticut, Maine, Massachusetts, New
   Hampshire, Rhode Island, and Vermont.

 - MIDDLE ATLANTIC: New Jersey, New York, and Pennsylvania.

 - EAST NORTH CENTRAL: Illinois, Indiana, Michigan, Ohio, and
   Wisconsin.

 - WEST NORTH CENTRAL: Iowa, Kansas, Minnesota, Missouri,
   Nebraska, North Dakota, and South Dakota.

 - SOUTH ATLANTIC: Delaware, District of Columbia, Florida,
   Georgia, Maryland, North Carolina, South Carolina,
   Virginia, and West Virginia.

 - EAST SOUTH CENTRAL: Alabama, Kentucky, Mississippi, and
   Tennessee.

 - WEST SOUTH CENTRAL: Arkansas, Louisiana, Oklahoma, and
   Texas.

 - MOUNTAIN: Arizona, Colorado, Idaho, Montana, Nevada,
   New Mexico, Utah, and Wyoming.

 - PACIFIC: Alaska, California, Hawaii, Oregon, and
   Washington.

SERVSETA	SERVICE SETTING AT ADMISSION

Location: 52-53 (width: 2; decimal: 0)

Variable Type: numeric

Range of Missing Values (M): -9

Question:

Describes the type of service and treatment setting in which
the client is placed at the time of admission or transfer.

 - DETOXIFICATION, 24-HOUR SERVICE, HOSPITAL INPATIENT:
   24 hour per day medical acute care services in hospital
   setting for detoxification of persons with severe medical
   complications associated with withdrawal.

 - DETOXIFICATION, 24-HOUR SERVICE, FREE-STANDING RESIDENTIAL:
   24 hour per day services in non-hospital setting providing
   for safe withdrawal and transition to ongoing treatment.

 - REHABILITATION/RESIDENTIAL - HOSPITAL (OTHER THAN DETOX):
   24 hour per day medical care in a hospital facility in
   conjunction with treatment services for alcohol and other
   drug abuse and dependency.

 - REHABILITATION/RESIDENTIAL - SHORT TERM (30 DAYS OR FEWER):
   Typically, 30 days or less of non-acute care in a setting
   with treatment services for alcohol and other drug abuse
   and dependency.

 - REHABILITATION/RESIDENTIAL - LONG TERM (MORE THAN 30 DAYS):
   Typically, more than 30 days of non-acute care in a setting
   with treatment services for alcohol and other drug abuse
   and dependency; this may include transitional living
   arrangements such as halfway houses.

 - AMBULATORY - INTENSIVE OUTPATIENT:
   As a minimum, the client receives treatment lasting two or
   more hours per day for three or more days per week.

 - AMBULATORY - NON-INTENSIVE OUTPATIENT:
   Ambulatory treatment services including individual, family,
   and/or group services, and may include pharmacological
   therapies.

 - AMBULATORY - DETOXIFICATION:
   Outpatient treatment services providing for safe
   withdrawal in an ambulatory setting (pharmacological
   or non-pharmacological).

PSOURCE	PRINCIPAL SOURCE OF REFERRAL

Location: 59-60 (width: 2; decimal: 0)

Variable Type: numeric

Range of Missing Values (M): -9

Question:

Describes the person or agency referring the client to the
alcohol or drug abuse treatment program:

 - INDIVIDUAL (INCLUDES SELF-REFERRAL): Includes the client,
   a family member, friend, or any other individual who would
   not be included in any of the following categories. Includes
   self-referral due to pending DWU/DUI.

 - ALCOHOL/DRUG ABUSE CARE PROVIDER: Any program, clinic,
   or other HEALTH CARE PROVIDER whose principal objective
   is treating clients with substance abuse problems, or a
   program whose activities are related to alcohol or other
   drug abuse prevention, education, or treatment.

 - OTHER HEALTH CARE PROVIDER: A physician, psychiatrist,
   or other licensed health care professional; or general
   hospital, psychiatric hospital, mental health program,
   or nursing home.

 - SCHOOL (EDUCATIONAL): A school principal, counselor, or
   teacher; or a student assistance program (SAP), the school
   system, or an educational agency.

 - EMPLOYER/EAP: A supervisor or an employee counselor.

 - OTHER COMMUNITY REFERRAL: Community or religious
   organization or any Federal, State, or local agency that
   provides aid in the areas of poverty relief, unemployment,
   shelter, or social welfare. Self-help groups such as
   Alcoholics Anonymous (AA), Al-Anon, and Narcotics Anonymous
   (NA) are also included in this category. Defense attorneys
   are also included in this category.

 - COURT / CRIMINAL JUSTICE REFERRAL / DUI/DWI: Any police
   official, judge, prosecutor, probation officer, or other
   person affiliated with a Federal, State, or county
   judicial system. Includes referral by a court for
   DWI/DUI, clients referred in lieu of or for deferred
   prosecution, or during pretrial release, or before or
   after official adjudication. Includes clients on
   pre-parole, pre-release, work or home furlough, or TASC.
   Client need not be officially designated as "on parole."
   Includes clients referred through civil commitment. Client
   referrals in this category are further defined in the

DETCRIM	DETAILED CRIMINAL JUSTICE REFERRAL

Location:	61-62 (width: 2; decimal: 0)
Variable Type:	numeric
Range of Missing Values (M):	-9
Question:	

This field gives more detailed information about those clients who are coded as "Criminal Justice Referral" in the Minimum Data Set field for "Principal Source of Referral" (PSOURCE).

- STATE/FEDERAL COURT, OTHER COURT

- PROBATION/PAROLE

- DIVERSIONARY PROGRAM (e.g. TASC)

- PRISON

- DUI/DWI

- OTHER RECOGNIZED LEGAL ENTITY, OTHER: Other recognized legal entities includes local law enforcement agency, corrections agency, youth services, review board/agency)

Guidelines: This field is to be used only Principal Source of Referral in the Minimum Data Set field is coded 07, "Criminal Justice Referral." For all other Principal Source of Referral codes (01 to 06 and missing), this field should be coded as Missing.

NOPRIOR	NUMBER OF PRIOR TREATMENT EPISODES

Location: 63-64 (width: 2; decimal: 0)

Variable Type: numeric

Range of Missing Values (M):   -9

Question:

Indicates the number of previous treatment episodes the
client has received in any drug or alcohol program. Changes
in service for the same episode (transfers) should not be
counted as separate prior episodes.

Guidelines: It is preferred that the number of prior
treatments be a self-reported field collected at the
time of client intake. However, this data item may be
derived from the State data system, if the system has
that capability, and episodes can be counted for at
least several years.

SUB1	SUBSTANCE PROBLEM CODE (PRIMARY)

Location: 65-66 (width: 2; decimal: 0)

Variable Type: numeric

Range of Missing Values (M):   -9

Question:

This field identifies the client's primary substance problem.

(1) NONE

(2) ALCOHOL

(3) COCAINE/CRACK

(4) MARIJUANA/HASHISH: Includes THC and any other
     cannabis sativa preparations.

(5) HEROIN

(6) NON-PRESCRIPTION METHADONE

(7) OTHER OPIATES AND SYNTHETICS: Includes buprenorphine,
     codeine, Hydrocodone, hydromorphone, meperidine, morphine,
     opium, oxycodone, pentazocine, propoxyphene, tramadol, and
     any other drug with morphine-like effects.

(8) PCP: Phencyclidine

(9) OTHER HALLUCINOGENS: Includes LSD, DMT, STP,
     hallucinogens, mescaline, peyote, psilocybin, etc.

(10) METHAMPHETAMINE

(11) OTHER AMPHETAMINES: Includes amphetamines, MDMA,
     phenmetrazine, and other unspecified amines and
     related drugs.

(12) OTHER STIMULANTS: Includes methylphenidate and any other
     stimulants.

(13) BENZODIAZEPINES: Includes alprazolam, chlordiazepoxide,
     clonazepam, clorazepate, diazepam, flunitrazepam,
     flurazepam, halazepam, lorazepam, oxazepam, prazepam,
     temazepam, triazolam, and other unspecified benzodiazepines.

(14) OTHER NON-BENZODIAZEPINE TRANQUILIZERS: Includes
     meprobamate, tranquilizers, etc.

(15) BARBITURATES: Includes amobarbital, pentobarbital,
     phenobarbital, secobarbital, etc.

(16) OTHER NON-BARBITURATE SEDATIVES OR HYPNOTICS: Includes
     chloral hydrate, ethchlorvynol, glutethimide, methaqualone,
     sedatives/hypnotics, etc.

(17) INHALANTS: Includes chloroform, ether, gasoline, glue,
     nitrous oxide, paint thinner, etc.
