Terms of Use

These data are distributed under the following terms of use. By continuing past this page, you signify your agreement to comply with the requirements as stated below:

Privacy of Research Subjects

Any intentional identification of a research subject (whether an individual or an organization) or unauthorized disclosure of his or her confidential information violates the promise of confidentiality given to the providers of the information. Disclosure of confidential information may also be punishable under federal law. Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for re-identification of specific research subjects.
- To make no use of the identity of any research subject discovered inadvertently and to report any such discovery to CBHSQ and SAMHDA (samhda-support@samhsa.hhs.gov)

Citing Data

You agree to reference the recommended bibliographic citation in any of your publications that use SAMHDA data. Authors of publications that use SAMHDA data are required to send citations of their published works for inclusion in a database of related publications.

Disclaimer

You acknowledge that SAMHSA will bear no responsibility for your use of the data or for your interpretations or inferences based upon such uses.

Violations

If CBHSQ determines that this terms of use agreement has been violated, then possible sanctions could include:

- Report of the violation to the Research Integrity Officer, Institutional Review Board, or Human Subjects Review Committee of the user's institution. A range of sanctions are available to institutions including revocation of tenure and termination.
- If the confidentiality of human subjects has been violated, then report of the violation may be made to the Federal Office for Human Research Protections. This may result in an investigation of the user's institution, which can result in institution-wide sanctions including the suspension of all research grants.
- Report of the violation of federal law to the United States Attorney General for possible prosecution.
- Court awarded payments of damages to any individual(s)/organization(s) harmed by the breach of confidential data.

Definitions

Center for Behavioral Health Statistics and Quality

Promise of confidentiality

A promise to a respondent or research participant that the information the respondent provides will not be disseminated in identifiable form without the permission of the respondent; that the fact that the respondent participated in the study will not be disclosed; and that disseminated information will include no linkages to the identity of the respondent. Such a promise encompasses traditional notions of both confidentiality and anonymity. In most cases, federal law protects the confidentiality of the respondent's identity as referenced in the Promise of Confidentiality. Under this condition, names and other identifying information regarding respondents would be confidential.

Research subject

A person or organization that participates in a research study. A research subject may also be called a respondent. A respondent is generally a survey respondent or informant, experimental or observational subject, focus group participant, or any other person providing information to a study.

Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

DESCRIPTION OF THE NATIONAL SURVEY OF SUBSTANCE ABUSE TREATMENT SERVICES (N-SSATS)

This report presents tabular information and highlights from the 2006 National Survey of Substance Abuse Treatment Services (N-SSATS), conducted between March and October 2006, with a reference date of March 31, 2006. It is the 28th in a series of national surveys begun in the 1970s designed to collect data on the location, characteristics, and utilization of alcohol and drug treatment facilities and services throughout the 50 States, the District of Columbia, and other U.S. jurisdictions.¹ The Office of Applied Studies, Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services, plans and directs N-SSATS.

N-SSATS is designed to collect information from all facilities² in the United States, both public and private, that provide substance abuse treatment. (Additional information on N-SSATS, its history, and changes in the survey and survey universe over time is provided in Appendix A.)

N-SSATS provides the mechanism for quantifying the dynamic character and composition of the U.S. substance abuse treatment delivery system. The objectives of N-SSATS are to collect

multipurpose data that can be used to—

- assist SAMHSA and State and local governments in assessing the nature and extent of services provided in State-supported and other treatment facilities and in forecasting treatment resource requirements;
- update SAMHSA's Inventory of Substance Abuse Treatment Services (I-SATS), which includes all known drug and alcohol abuse treatment facilities (see Appendix A);
- analyze treatment services trends and conduct comparative analyses for the nation, regions, and States;
- generate the *National Directory of Drug and Alcohol Abuse Treatment Programs*, a compendium of facilities approved by State substance abuse agencies for the provision of substance abuse treatment; and
- update the information in SAMHSA's Substance Abuse Treatment Facility Locator, a searchable database of facilities approved by State substance abuse agencies for the provision of substance abuse treatment. The Treatment Facility Locator is available on the Internet at:

<http://fndtreatment.samhsa.gov>

¹ The jurisdictions include the territory of Guam, the Federated States of Micronesia, the Republic of Palau, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

² In this report, entities responding to N-SSATS are referred to as "facilities."

Data Collection Procedures for the 2006 N-SSATS

Field period and reference date

The field period for the 2006 N-SSATS ran from March 31, 2006, through October 3, 2006, with a reference date of March 31, 2006.

Survey coverage

The 2006 N-SSATS facility universe included all 17,143 active treatment facilities on SAMHSA's I-SATS at a point 6 weeks prior to the survey reference date. Facilities added by State substance abuse agencies or discovered during the first 3 weeks of the survey that were also included in the survey universe.

Content

The 2006 N-SSATS survey instrument was a 12-page document with 37 numbered questions. (See Appendix B.) Topics included:

- Facility identification information
- Facility focus (substance abuse treatment services, mental health services, mix of mental health and substance abuse treatment services, general health care, other)
- Facility operation (private for-profit; private non-profit; government—local, county, or community; State; Federal; tribal)
- Hotline operation
- Services offered (assessment services, substance abuse therapy and counseling, pharmacotherapies, testing, transitional services, other services)
- Operation of an Opioid Treatment Program (OTP) certified by the Substance Abuse and Mental Health Services Administration
- Services in sign language for the hearing impaired
- Services in languages other than English

- Special programs or groups offered for specific types of clients (adolescents, clients with co-occurring mental and substance abuse disorders, criminal justice clients, persons with HIV or AIDS, gays or lesbians, seniors or older adults, adult women, pregnant or postpartum women, adult men, DUI/DWI offenders, other)
- Types of treatment provided
 - Hospital inpatient (detoxification, treatment)
 - Non-hospital residential (detoxification, short-term—30 days or less, long-term—more than 30 days)
 - Outpatient (detoxification, methadone maintenance, day treatment or partial hospitalization, intensive, regular)
- Payment options
- Receipt of public funding for substance abuse treatment programs
- Managed care participation
- Number of clients in treatment on March 31, 2006 (total, clients under age 18, clients receiving methadone or buprenorphine)
- Number of beds designated for non-hospital residential and hospital inpatient substance abuse treatment
- Client substance abuse problem treated (abuse of both alcohol and drugs, alcohol abuse only, drug abuse only)
- Facility licensure, certification, or accreditation
- Facility Internet access and web site availability

Data collection

Table 1.1
N-SSATS forms accounting, response rate, and
mode of response: 2006

	<i>Number</i>	<i>Percent</i>
Total facilities in survey	17,143	100.0
Closed/ineligible	2,034	11.9
Eligible	15,109	88.1
Total eligible	15,109	100.0
Non-respondents	532	3.5
Respondents	14,577	96.5
Excluded from report ¹	401	2.7
Roll-ups ²	405	2.7
Included in report	13,771	91.1
Mode of response	13,771	100.0
Mail	5,607	40.7
Internet	5,034	36.6
Telephone	3,130	22.7

¹ Facilities deemed out of the scope of this report. See text for details.

² Facilities whose client counts were included in or "rolled into" other facilities' counts and whose facility characteristics were not reported separately.

SOURCE: Office of Applied Studies, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006.

Six weeks before the survey letters were mailed to all facilities to alert them to expect the survey. An additional benefit of the letters was to update records with new address information returned from the post office. On the survey reference date, data collection packets, including the questionnaire, SAMHSA cover letter, State-specific letter of endorsement, information on completing the survey on the Internet, and a sheet of *Frequently Asked Questions*, were mailed to each facility. During the data collection phase, contract personnel were available to answer facilities' questions concerning the survey. Support in responding to questions for those facilities completing the questionnaire over the Internet was also available. Four to 5 weeks after the initial questionnaire mailing, thank you/reminder

letters were sent to all facilities. Approximately 8 weeks after the initial questionnaire mailing, non-responding facilities were sent a second questionnaire mailing. About 4 to 5 weeks after the second questionnaire mailing, non-respondents received a reminder telephone call. Those facilities that had not responded within 2 to 3 weeks of the reminder call were telephoned and asked to complete the survey by telephone. The overall response rate was 97 percent.

Forms accounting and response rate

Summary response rate information is presented in Table 1.1. Questionnaires were mailed to a total of 17,143 facilities believed to offer substance abuse treatment services. Of these facilities, 12 percent were found to be ineligible for the survey because they had closed or did not provide substance abuse treatment or detoxification on March 31, 2006. Of the remaining 15,109 facilities, 97 percent completed the survey.

Exclusions

Of the 14,577 survey respondents, 401 facilities provided information but were deemed out of the scope of this report and were excluded from the analyses presented here. The excluded facilities fell into three categories:

- 154 excluded facilities were halfway houses that did not provide substance abuse treatment. These facilities were included in the survey so that they could be listed in the Directory and on the Treatment Facility Locator, but were excluded from the analyses in this report.
- 94 excluded facilities were jails, prisons, or other organizations that treated incarcerated clients exclusively.
- 153 excluded facilities were solo practitioners. I-SATS and N-SSATS are designed to include facilities rather than individuals. Solo practitioners are listed and surveyed only if the State substance abuse agency

Table 1.2
Number of N-SSATS facilities reporting client and/or facility data: 2006

<i>Type of data reported</i>	<i>Number of facilities for which facility characteristics were reported¹</i>	<i>Number of facilities for which client counts were reported</i>
Total	13,771	1,337
Facility characteristics and client counts for responding facility only	12,056	0
Facility characteristics for responding facility only; client counts for responding facility and other facilities as well	661	1,337
Facility characteristics only (client counts reported by another facility)	1,054	0

¹ Excludes 141 non-treatment halfway houses, 33 facilities treating incarcerated clients only, and 161 non-State-approved solo practitioners.

SOURCE: Office of Applied Studies, Substance Abuse and Mental Health Services Administration, National Survey of Substance Abuse Treatment Services (N-SSATS), 2006.

explicitly requests that they be included. The excluded solo practitioners had not been identified for inclusion by the State substance abuse agency.

An additional 405 facilities whose client counts were included in or “rolled into” other facilities’ counts and whose facility characteristics were not reported separately were also excluded from facility counts in this report. However, their client counts are included.

After allowing for the exclusion of 401 out-of-scope facilities and 405 rolled-up facilities, 13,771 eligible respondent facilities were included in the 2006 N-SSATS report.

Number of respondents reporting facility and client data

Table 1.2. There were a total of 13,771 eligible respondents to the 2006 N-SSATS. The breakdown of these respondents with respect to their reporting of facility data and client counts is summarized below.

- 12,056 facilities reported facility data and

client counts for their own or organizations. (One facility reported facility data but refused to report client data.)

- 661 facilities reported facility characteristics for their own facility and provided client counts for their own facility and for other facilities. These 661 facilities reported client counts for a total of 1,337 facilities, including themselves.
- 1,054 facilities reported facility characteristics only. Their client counts were reported by another facility.

Quality assurance

All mail questionnaires were reviewed manually for consistency and for missing data. After data entry, automated quality assurance reviews were conducted. These incorporated the rules used in manual editing, plus consistency checks and checks for data outliers not readily implemented by manual review. Calls were made to facilities to clarify questionable responses and to obtain missing data.

If facilities could not be reached during the edit callbacks, responses that were clearly in error were replaced by imputation.

The Internet questionnaire was programmed to be self-editing; that is, respondents were prompted to complete missing responses and to confirm or correct inconsistent responses.

Item non-response

Careful editing and extensive follow-up have minimized item non-response. Item non-response was generally low, averaging 2 percent across all items. It was 10 percent or more for only five items.

Missing data for client count variables (i.e., the number of clients in hospital inpatient, non-hospital residential, and outpatient treatment and their subcategories) were imputed, as were total annual admissions. For the remaining variables, facilities with missing values for a given variable were excluded from the tabulations using that variable. As a result, the number of treatment facilities on which tables are based may vary somewhat from table to table. The number of facilities actually reporting data is generally included on each table.

Methodology of Imputation of Missing Data and Outliers

A total of 92 facilities were missing one-day census client count values for one or more types of service. A facility was given an imputed value for a type of service if it reported that it provided the service but had not provided client counts for that service type. For example, if a facility reported that it provided hospital inpatient services and outpatient services, but not non-hospital residential services, client values were imputed for the hospital inpatient and outpatient variables only.

When available, client values from the 2005 N-SSATS were used to impute the missing client counts on the 2006 N-SSATS. In all other cases,

the average client value, stratified by State and facility operation, was used to impute the missing client counts. If a facility were unique in its State and facility operation category, values were imputed using average values for the State only. Missing client counts were imputed for each type of service (i.e., hospital inpatient detoxification, hospital inpatient treatment, non-hospital residential detoxification, etc.) and summed to the larger service type totals (total hospital inpatient clients, total non-hospital residential clients, and total outpatient clients), and finally to total clients.

Further Data Considerations and Limitations

As with any data collection effort, certain procedural considerations and data limitations must be taken into account when interpreting data from the 2006 N-SSATS. Some general issues are listed below, and other considerations are detailed in Appendix A. Considerations and limitations of specific data items are discussed where the data are presented.

- N-SSATS attempts to obtain responses from all known treatment facilities, but it is a voluntary survey. There is no adjustment for the approximately 5 percent facility non-response.
- N-SSATS is a point-prevalence survey. It provides information on the substance abuse treatment system and its clients on the reference date. Client counts reported here do not represent annual totals. Rather, N-SSATS provides a “snapshot” of substance abuse treatment facilities and clients on an average day.
- Multiple responses were allowed for certain variables (e.g., services provided and specialized programs). Tabulations of these variables include the total number of facilities reporting each response.

Terminology

The majority of tables in the report are organized according to facility operation and the primary focus of the facility, and present data on the characteristics of facilities and clients in treatment at these facilities. Therefore, it is important to define these terms.

Facility operation indicates the type of entity responsible for the operation of the facility: private for-profit; private non-profit; or government—local, county, or community; State; Federal; or tribal.

Primary focus indicates the services the facility primarily provides: substance abuse treatment services; mental health services; a mix of mental health and substance abuse treatment services; general health care; or other.

Clients in treatment were defined as: 1) hospital inpatient and non-hospital residential clients receiving substance abuse services at the facility on March 31, 2006; and 2) outpatient clients who were seen at the facility for a substance abuse treatment or detoxification service at least once during the month of March 2006, and who were still enrolled in treatment as of March 31, 2006.

N-SSATS BACKGROUND

Survey History

N-SSATS has evolved from national survey efforts begun in the 1970s by the National Institute on Drug Abuse (NIDA) to measure the scope and use of drug abuse treatment services in the United States. The sixth of these surveys, conducted in 1976, introduced the data elements and format that have formed the core of subsequent surveys. These include organizational focus, service orientation, services available, clients in treatment by type of care, and inpatient/residential capacity. The 1976 survey, called the National Drug Abuse Treatment Utilization Survey, was repeated in 1977 and 1978.

In 1979, the National Institute on Alcohol Abuse and Alcoholism (NIAAA) became a cosponsor of the survey, alcoholism treatment facilities were added, and the study was renamed the National Drug and Alcoholism Treatment Utilization Survey. This survey was repeated in 1980 and 1982. In 1984, a one-page version called the National Alcoholism and Drug Abuse Program Inventory was used. In 1987, the full version of the survey was reinstated and renamed the National Drug and Alcoholism Treatment Unit Survey (NDATUS). NDATUS was conducted annually from 1989 to 1993.

In 1992, with the creation of SAMHSA, responsibility for conducting the survey shifted to SAMHSA's Office of Applied Studies. The survey was redesigned, and conducted annually as the Uniform Facility Data Set (UFDS) survey from 1995 to 1998. During these years, the survey was conducted by mail with telephone follow-up of non-respondents. The 1999 survey year was a transition year during which the survey was redesigned, and an abbreviated

telephone survey of treatment facilities was conducted. In 2000, a redesigned full mail survey was reinstated with telephone follow-up; it was renamed the National Survey of Substance Abuse Treatment Services (N-SSATS). The reference date for the annual survey had always been the end of September or beginning of October. After the 2000 survey, the reference date was changed to the end of March, and no survey was conducted during 2001.

In 2000, the use of an Internet-based questionnaire was tested, and beginning in 2002, all facilities were offered the opportunity to respond via the Internet.

N-SSATS in the Context of the Drug and Alcohol Services Information System (DASIS)

N-SSATS is one of the three components of SAMHSA's Drug and Alcohol Services Information System (DASIS). The core of DASIS is the Inventory of Substance Abuse Treatment Services (I-SATS), a continuously-updated, comprehensive listing of all known substance abuse treatment facilities. The other components of DASIS are N-SSATS and the Treatment Episode Data Set (TEDS), a client-level database of admissions to substance abuse treatment. Together, the components provide national- and State-level information on the numbers and characteristics of individuals admitted to alcohol and drug treatment programs and describe the facilities that deliver care to those individuals.

I-SATS is the list frame for N-SSATS. Facilities in I-SATS fall into two general categories and are distinguished by the relationship of the fa

cility to its State substance abuse agency These categories are described below.

Treatment facilities approved by State substance abuse agencies

The largest group of facilities (11,184 in 2006) includes facilities that are licensed, certified, or otherwise approved by the State substance abuse agency to provide substance abuse treatment. State DASIS representatives maintain this segment of I-SATS by reporting new facilities, closures, and address changes to SAMHSA. Some facilities are not licensed, certified, or otherwise approved by the State agency. Some private for-profit facilities fall into this category. This group also includes programs operated by Federal agencies, the Department of Veterans Affairs (VA), the Department of Defense, and the Indian Health Service. I-SATS records for Federally-operated facilities are updated annually through lists provided by these agencies.

Treatment facilities not approved by State substance abuse agencies

This group of facilities (1,953 in 2006) represents the SAMHSA effort in recent years to make I-SATS as comprehensive as possible by including treatment facilities that State substance abuse agencies, for a variety of reasons, do not fund, license, or certify. Many of these facilities are private for-profit, small group practices, or hospital-based programs. Most of them are identified through periodic screening of alternative source databases. (See *Special efforts to improve survey coverage* below.) State substance abuse agencies are given the opportunity to review these facilities and to add them to the State agency-approved list, if appropriate.

Survey Coverage

The use of I-SATS as the list frame for N-SSATS imposes certain constraints related to the unit of response and the scope of facilities included. In addition, the expansion of I-SATS in recent

years to provide a more complete enumeration of substance abuse treatment facilities means that year-to-year comparisons of the numbers of facilities reporting to N-SSATS must be interpreted with caution.

Unit of response

N-SSATS is designed to collect data from each physical location where treatment services are provided. Accordingly, SAMHSA requests that State substance abuse agencies use the point of delivery of service (i.e., physical location) as the defining factor for a facility. It also requests that facilities be included in I-SATS, N-SSATS, and TEDS at the same administrative level so that record linkage among the three data sets is valid. Because of the different State administrative systems, however, there are some inconsistencies in implementation. For example, in some States, multiple treatment programs (e.g., detoxification, residential, and outpatient) at the same address and under the same management have separate State licenses. These are treated as separate by the State substance abuse agency, and are given separate I-SATS ID numbers. In other States, multiple sites are included as a single entity under a parent or administrative unit. In many of these cases, individual sites can report services data in N-SSATS, but client data are available only at a higher administrative level. Beginning in 1995, efforts have been made to identify facility networks and to eliminate duplicate reporting by networks. For most facilities, reporting level remains consistent from year to year. However, beginning in 1998, an emphasis was placed on collecting minimum information from all physical locations, and this has resulted in an increase in the number of facilities.

Special efforts to improve survey coverage

The great majority of treatment facilities in I-SATS are administratively monitored by State substance abuse agencies. Therefore, the scope of facilities included in I-SATS is affected by

differences in State systems of licensure, certification, accreditation, and the disbursement of public funds. For example, some State substance abuse agencies regulate private facilities and individual practitioners while others do not. In some States, hospital-based substance abuse treatment facilities are not licensed through the State substance abuse agency.

To address these differences, SAMHSA conducted a large-scale effort during 1995 and 1996 to identify substance abuse treatment facilities that, for a variety of reasons, were not on I-SATS. Some 15 source lists were considered, and facilities not on I-SATS were contacted to ascertain whether they provided substance abuse treatment. As expected, this yielded a number of hospital-based and small private facilities that were not on I-SATS. (These facilities were surveyed in 1995 and 1996, but they were not included in the published results of the survey until 1997.) Analysis of the results of this effort led to similar but more targeted updates before subsequent surveys. Potential new facilities are identified using data from the American Business Index, the annual American Hospital Association survey, and SAMHSA's biannual Inventory of Mental Health Organizations, the source lists that yielded the most new facilities in 1995 and 1996. Additional facilities are also identified during the survey itself by survey participants, who are asked to report all of the treatment facilities in their administrative networks. All newly identified facilities are initially included as not approved by the State substance abuse agency. State substance abuse agencies are given the opportunity to review these facilities and to add them to the State agency-approved list, if appropriate.

Expansion of survey coverage to include all sites within networks at which treatment was provided yielded a net increase of about 2,600 facilities between 1997 and 1998. These additions were not necessarily new facilities, but were facilities not previously included in the survey as separate

sites. The number of facilities reporting continued to increase in 1999, but at a slower pace, a net increase of 1,800 facilities. The increase between 1998 and 1999 was in large part because of the improved survey response rate (95 percent in 1999 vs. 90 percent in 1998). Between 2000 and 2006, the number of facilities remained constant, at between 13,000 and 14,000. The total number is deceptive, however. There was significant turnover as facilities closed and others opened. (See Table 2.1.)

Data collection

Until 1996, State substance abuse agencies distributed and collected the UFDS survey forms. Beginning in 1996, data collection was centralized; since that time, SAMHSA has mailed facility survey forms directly to and collected forms directly from the facilities, and has conducted follow-up telephone interviews with the facility director or his/her designee.

Non-response

Beginning in 1992, SAMHSA expanded efforts to obtain information from non-responding facilities. A representative sample of non-respondents was contacted and administered an abbreviated version of the survey instrument via telephone. In 1993 and later years, this effort was extended to all non-responding facilities. In 1997, a series of measures was introduced to enhance the survey response rate. These included advance notification and improved methods for updating address and contact information. Between 2000 and 2006, use of these methods and intensive telephone follow-up resulted in an annual non-response rate of only 4 to 6 percent. In 2006, it was possible either to complete the survey or to determine that the facility had closed or was otherwise ineligible for 97 percent of facilities in the sample.

Exclusions

In 1997, facilities offering only DUI/DWI

Table A.1

programs were excluded; these facilities were reinstated in 1998.

Facilities operated by the Bureau of Prisons (BOP) were excluded from the 1997 UFDS survey and subsequent surveys because SAMHSA conducted a separate survey of correctional facilities.¹ During that survey, it was discovered that jails, prisons, and other organizations treating incarcerated persons only were poorly enumerated on I-SATS. Beginning in 1999, these facilities were identified during the survey

and excluded from analyses and public-use data files.

I-SATS and N-SSATS are designed to include specialty substance abuse treatment facilities rather than individuals. Solo practitioners are listed on I-SATS and surveyed in N-SSATS only if the State substance abuse agency explicitly requests that they be included.

Beginning in 2000, halfway houses that did not provide substance abuse treatment were included on I-SATS and in N-SSATS so that they could be listed in the *National Directory of Drug and Alcohol Abuse Treatment Programs* and on the Treatment Facility Locator (<http://ndtreatment.samhsa.gov>). These facilities were excluded from analyses and public-use data files.

Drug and Alcohol Services Information System Series: S-9. DHHS Publication No. (SMA) 00-3380. Rockville, MD, 2000.

Changes in Survey Content

Since 1992, SAMHSA has made adjustments each year to the survey design, both to minimize non-response and to include areas of emerging interest such as the role of managed care. *Table A.1* shows the major content areas for the survey from 1995 to 2006.

National Survey of Substance Abuse Treatment Services (N-SSATS), 2006

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.

Location: 7-8 (width: 2; decimal: 0)

Variable Type: numeric

REGION: Added: Census Region

CENSUS REGION: Geographic regions used are based on divisions used by the U.S. Bureau of Census, 1970 Census of Population. They are comprised of the following states and territories:

- U.S. TERRITORIES: American Samoa, Fed Micronesia, Guam, Palau, Puerto Rico, Virgin Islands.
- NORTHEAST: New England Division (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont) and Middle Atlantic Division (New Jersey, New York, Pennsylvania).
- MIDWEST: East North Central Division (Illinois, Indiana, Michigan, Ohio, Wisconsin) and West North Central Division (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota).
- SOUTH: South Atlantic Division (Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia) and East South Central Division (Alabama, Kentucky, Mississippi, Tennessee), and West South Central Division (Arkansas, Louisiana, Oklahoma, Texas).
- WEST: Mountain Division (Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, Wyoming) and Pacific Division (Alaska, California, Hawaii, Oregon, Washington).

Location: 9-9 (width: 1; decimal: 0)
Variable Type: numeric

DIVISION: Added: Census Division

CENSUS DIVISION: Census divisions are groupings of states that are subdivisions of the four census regions. There are nine divisions, which the Census Bureau adopted in 1910 for the presentation of data. The divisions and the states

included in them are:

- U.S. TERRITORIES: American Samoa, Fed Micronesia, Guam, Palau, Puerto Rico, Virgin Islands.
- NEW ENGLAND: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
- MIDDLE ATLANTIC: New Jersey, New York, and Pennsylvania.
- EAST NORTH CENTRAL: Illinois, Indiana, Michigan, Ohio, and Wisconsin.
- WEST NORTH CENTRAL: Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and South Dakota.
- SOUTH ATLANTIC: Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, and West Virginia.
- EAST SOUTH CENTRAL: Alabama, Kentucky, Mississippi, and Tennessee.
- WEST SOUTH CENTRAL: Arkansas, Louisiana, Oklahoma, and Texas.
- MOUNTAIN: Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah, and Wyoming.
- PACIFIC: Alaska, California, Hawaii, Oregon, and Washington.

HOTYN: Hotline - yes/no

9. Does this facility operate a hotline that responds to substance abuse problems?

A hotline is a telephone service that provides information, referral, or immediate counseling, frequently in a crisis

situation.

If this facility is part of a group of facilities that operates a central hotline to respond to substance abuse problems, you should mark "yes."

Do not consider 911 or the local police number a hotline for the purpose of this survey.

T_CLI5: Clients in regular Outpat'nt Care

27a. As of March 31, 2006, how many active clients were enrolled in each of the following OUTPATIENT substance abuse services at this facility?

(5) Regular outpatient treatment
(fewer hours per week than intensive)

An active outpatient client is someone who:

1 - was seen at this facility for substance abuse treatment or detoxification at least once during the month of March 2006

AND

2 - was still enrolled in treatment on March 31, 2006.

COUNT a client in one service only, even if the client received multiple services.

DO NOT count family members, friends, or other non-treatment clients.

Variable Type: numeric

(Range of) Missing Values: -10 , -9 , -8 , -7 , -6 , -5 , -4 , -2 , -1

TOTADMIS: Total # of admissions for Sub Abuse Tx

29. In the 12 months beginning April 1, 2005, and ending March 31, 2006, how many ADMISSIONS for substance abuse treatment did this facility have? Count every admission and re-admission in this 12-month period. If a person was admitted 3 times, count this as 3 admissions.

Number of substance abuse admissions in 12-month period

FOR OUTPATIENT CLIENTS, consider an admission to be the initiation of a treatment program or course of treatment. Count admissions into treatment, not individual treatment visits.

IF DATA FOR THIS TIME PERIOD are not available, use the most recent 12-month period for which you have data.

IF THIS IS A MENTAL HEALTH FACILITY, count all admissions in which clients received substance abuse treatment, even if substance abuse was their secondary diagnosis.
